| Capability Map |
| --- |
| **Definition** |
| Ability to establish, organize, analyze, administer, and report on all aspects of a name, symbol, or design that identifies and differentiates products, offerings, or organizational identities. |
| Ability to establish and identify a brand. |
| Ability to declare a brand. |
| Ability to recognize a brand. |
| Ability to organize, aggregate, segment, and prioritize a collection of brands. |
| Ability to determine how well a brand is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a brand. |
| Ability to determine if a brand is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a brand to underperform. |
| Ability to assess and quantify the commitment and staying power that the brand has within the markets in which it has a presence. |
| Ability to assess and quantify the degree of familiarity and recognition a brand has within and across various markets. |
| Ability to identify and specify the stakeholders, markets, locations, and industry sectors marked for building brand awareness. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a brand. |
| Ability to identify and define the level of risk associated with a brand. |
| Ability to identify and define the level of acceptable risk associated with a brand. |
| Ability to consider a collective set of risk factors about a brand and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a brand or its component parts. |
| Ability to determine access rights limitations for a brand. |
| Ability to understand the access rights limitations for a brand. |
| Ability to impose access rights limitations for a brand. |
| Ability to associate a brand with other business objects. |
| Ability to associate a brand with a channel. |
| Ability to associate a brand with an intellectual property right. |
| Ability to associate a brand with an infrastructure. |
| Ability to associate a brand with a message. |

| Ability to associate a brand with a partner. |
| Ability to associate a brand with a plan. |
| Ability to associate a brand with a policy. |
| Ability to associate a brand with a public sector entity. |
| Ability to associate a brand with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a brand. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a brand and their relationships. |
| Ability to determine, modify, and interpret the category or classification of a brand. |
| Ability to determine, modify, and interpret the status or condition of a brand. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a brand. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a brand. |
| Ability to identify the need for, plan, design, execute, and measure the effectiveness of an outreach activity that targets a specific population, for example, constituents, human resources, partners, or patients, to achieve a certain goal such as marketing awareness, hiring activities, and health awareness. |
| Ability to establish and identify a campaign. |
| Ability to declare a campaign. |
| Ability to recognize a campaign. |
| Ability to define campaign collateral, including target-specific messaging, graphic designs for each delivery channel, as well as identify the right channel mix and execution sequence. |
| Ability to capture a campaign target's interests, actions, and answers. |
| Ability to define and optimize the campaign spend versus the value being delivered. |
| Ability to project the value being delivered through a campaign. |
| Ability to project the required spend to deliver a campaign. |
| Ability to balance the spend versus value-add for a campaign. |
| Ability to organize, aggregate, segment, and prioritize a collection of campaigns. |
| Ability to classify and analyze campaigns based on specific attributes. |
| Ability to group campaigns. |

| |
|---|
| Ability to evaluate and prioritize a collection of campaigns within a portfolio, based on specific attributes, such as cost, benefit, target demographic, and channel. |
| Ability to determine how well a campaign is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a campaign. |
| Ability to determine if a campaign is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a campaign to underperform. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a campaign. |
| Ability to identify and define the level of risk associated with a campaign. |
| Ability to identify and define the level of acceptable risk associated with a campaign. |
| Ability to consider a collective set of risk factors about a campaign and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a campaign or its component parts. |
| Ability to determine access rights limitations for a campaign. |

| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an intellectual property right. |

| |
|---|
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an intellectual property right and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an intellectual property right. |
| Ability to determine, modify, and interpret the status or condition of an intellectual property right. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an intellectual property right. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an intellectual property right. |
| Ability to control, organize, and allocate a set of resources expected to increase in value or provide income, in order to achieve a targeted balance of risk, return, and volatility. |
| Ability to determine how well an investment portfolio is meeting specification and objective levels, or delivering against plan. |
| Ability to assess what is causing an investment portfolio to underperform. |
| Ability to determine acceptable or unacceptable levels of performance for an investment portfolio. |
| Ability to determine if an investment portfolio is exceeding or falling short of an acceptable threshold of performance. |
| Ability to establish and identify an investment portfolio. |
| Ability to assess and determine the monetary worth of an investment portfolio in whole or in part. |
| Ability to declare an investment portfolio. |
| Ability to recognize an investment portfolio. |
| Ability to define the model or target allocation mix of investments to achieve the objectives as defined for the investment portfolio. |
| Ability to measure the current investment allocation mix of the investment portfolio allocation against the model allocation. |
| Ability to identify and determine which investment portfolio model best matches customer needs. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an investment portfolio. |
| Ability to identify and define the level of risk associated with an investment portfolio. |
| Ability to identify and define the level of acceptable risk associated with an investment portfolio. |
| Ability to consider a collective set of risk factors about an investment portfolio and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an investment portfolio or its component parts. |
| Ability to determine access rights limitations for an investment portfolio. |
| Ability to understand the access rights limitations for an investment portfolio. |

| |
|---|
| Ability to impose access rights limitations for an investment portfolio. |
| Ability to invest in different investment classes and in financial instruments of many issuers in an attempt to reduce overall investment risk due to poor performance of a single investment or financial instrument. |
| Ability to associate an investment portfolio with other business objects. |
| Ability to associate an investment portfolio with a currency. |
| Ability to associate an investment portfolio with a financial account. |
| Ability to associate an investment portfolio with a financial forecast. |
| Ability to associate an investment portfolio with a financial position. |
| Ability to associate an investment portfolio with a financial instrument. |
| Ability to associate an investment portfolio with a payment. |
| Ability to associate an investment portfolio with a policy. |
| Ability to associate an investment portfolio with research. |
| Ability to associate an investment portfolio with an investment portfolio. |
| Ability to associate an investment portfolio with an agreement. |
| Ability to associate an investment portfolio with a strategy. |
| Ability to associate an investment portfolio with a plan. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an investment portfolio. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an investment portfolio and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an investment portfolio. |
| Ability to determine, modify, and interpret the status or condition of an investment portfolio. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an investment portfolio. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an investment portfolio. |
| Ability to define, identify, quantify, qualify, analyze, segment, address, and create demand for existing or future government services by individuals, populations of individuals, or organizations. |
| Ability to establish and identify a market. |
| Ability to declare a market. |

| |
|---|
| Ability to recognize a market. |
| Ability to subdivide a market into unique, identifiable parts that may be targeted individually or in aggregate. |
| Ability to establish and identify a market segment. |
| Ability to declare a market segment. |
| Ability to recognize a market segment. |
| Ability to determine the properties associated with or describing a market segment. |
| Ability to determine the relative importance of market segments to organization objectives. |
| Ability to predict or estimate future trends over a defined period of time for a market or market segment. |
| Ability to identify and focus on a market or market segment with the intent of, for example, communicating value, offering products and services, and otherwise promoting certain interests. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a market. |
| Ability to identify and define the level of risk associated with a market. |
| Ability to identify and define the level of acceptable risk associated with a market. |
| Ability to consider a collective set of risk factors about a market and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a market or its component parts. |
| Ability to determine access rights limitations for a market. |
| Ability to understand the access rights limitations for a market. |
| Ability to impose access rights limitations for a market. |
| Ability to associate a market with other business objects. |
| Ability to associate a market with a brand. |
| Ability to associate a market with a currency. |
| Ability to associate a market with a location. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a market. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a market and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a market. |
| Ability to determine, modify, and interpret the status or condition of a market. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a market. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a market. |

| |
|---|
| Ability to define, craft, frame, vet, disseminate, and track a verbal, written, recorded, or digitally-represented communication, including missives, notifications, alerts, and other internally or externally targeted communication about an organization's mission, products, plans, activities, and other focal points. |
| Ability to establish and identify a message. |
| Ability to declare a message. |
| Ability to recognize a message. |
| Ability to shape the intention and impact of a message targeted to a specific audience. |
| Ability to constrain the range of a message to, for example, a desired audience or market. |
| Ability to draft and otherwise construct a message from its initial state through modifications and dispensation. |
| Ability to determine if a message is of high integrity and accuracy, appropriate to a given target, and generally a fit for its intended purpose. |
| Ability to acquire and acknowledge a message that has been disseminated. |
| Ability to obtain or secure a message. |
| Ability to confirm that a message has arrived at its intended destination. |
| Ability to understand the message that has been made available. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a message. |
| Ability to identify and define the level of risk associated with a message. |
| Ability to identify and define the level of acceptable risk associated with a message. |
| Ability to consider a collective set of risk factors about a message and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a message or its component parts. |
| Ability to determine access rights limitations for a message. |
| Ability to understand the access rights limitations for a message. |
| Ability to impose access rights limitations for a message. |
| Ability to associate a message with other business objects. |
| Ability to associate a message with an interaction. |
| Ability to associate a message with a message. |
| Ability to associate a message with an accreditation. |
| Ability to associate a message with an agreement. |
| Ability to associate a message with an asset. |

| Ability to define, interpret, and enforce the right to view, use, or modify a policy or its component parts. |
| Ability to determine access rights limitations for a policy. |
| Ability to understand the access rights limitations for a policy. |
| Ability to impose access rights limitations for a policy. |
| Ability to articulate and draft meaningful policy that is readably interpreted and deployable. |
| Ability to render policy in a written form. |
| Ability to ensure that a policy is ready for distribution. |
| Ability to determine that a policy is accurate, appropriate, and in accordance with legal or other constraints as circumstances demand. |
| Ability to associate a policy with other business objects. |
| Ability to associate a policy with a policy. |
| Ability to associate a policy with a location. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a policy. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a policy and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a policy. |
| Ability to determine, modify, and interpret the status or condition of a policy. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a policy. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a policy. |
| Ability to create, structure, and govern a governmental body or collection of governmental bodies. |
| Ability to establish and identify a public sector entity. |
| Ability to declare a public sector entity. |
| Ability to recognize a public sector entity. |
| Ability to define discrete public sector entity substructures, such as ministries, divisions, departments, business units and the like, and the relationships among those substructures and other public sector or private sector entities. |
| Ability to conceptualize and specify the intent, purpose, structure, responsibilities, and authority of a public sector entity. |
| Ability to define the legal ownership structure of the enterprise, such as a publicly controlled or publicly funded legal body. |
| Ability to determine how well a public sector entity is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a public sector entity. |

| |
|---|
| Ability to determine if a public sector entity is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a public sector entity to underperform. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a public sector entity. |
| Ability to identify and define the level of risk associated with a public sector entity. |
| Ability to identify and define the level of acceptable risk associated with a public sector entity. |
| Ability to consider a collective set of risk factors about a public sector entity and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a public sector entity or its component parts. |
| Ability to determine access rights limitations for a public sector entity. |
| Ability to understand the access rights limitations for a public sector entity. |
| Ability to impose access rights limitations for a public sector entity. |

| Ability to determine, modify, and interpret the status or condition of research. |
| Ability to identify, record, and represent a chronological order of events and actions associated with research. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of research. |
| Ability to define, articulate, and disseminate an integrated and aligned association of visions, goals, objectives, and courses of action that provides direction and guides activity. |
| Ability to establish and identify a strategy. |
| Ability to declare a strategy. |
| Ability to recognize a strategy. |
| Ability to conceptualize, develop, and express a strategy. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a strategy. |
| Ability to identify and define the level of risk associated with a strategy. |
| Ability to identify and define the level of acceptable risk associated with a strategy. |
| Ability to consider a collective set of risk factors about a strategy and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a strategy or its component parts. |
| Ability to determine access rights limitations for a strategy. |
| Ability to understand the access rights limitations for a strategy. |
| Ability to impose access rights limitations for a strategy. |
| Ability to determine how well a strategy is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a strategy. |
| Ability to determine if a strategy is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a strategy to underperform. |
| Ability to associate a strategy with other business objects. |
| Ability to associate a strategy with finance. |
| Ability to associate a strategy with a financial forecast. |
| Ability to associate a strategy with a financial position. |
| Ability to associate a strategy with a market. |

| |
|---|
| Ability to associate a strategy with a policy. |
| Ability to associate a strategy with research. |
| Ability to associate a strategy with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a strategy. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a strategy and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a strategy. |
| Ability to determine, modify, and interpret the status or condition of a strategy. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a strategy. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a strategy. |
| Ability to define, articulate, and control an imagined future state of being. |
| Ability to establish and identify a vision. |
| Ability to declare a vision. |
| Ability to recognize a vision. |
| Ability to conceptualize, develop, and express a vision. |
| Ability to define, interpret, and enforce the right to view, use, or modify a vision or its component parts. |
| Ability to determine access rights limitations for a vision. |
| Ability to understand the access rights limitations for a vision. |
| Ability to impose access rights limitations for a vision. |
| Ability to determine if a vision is appropriate, proper, and correct. |
| Ability to associate a vision with a goal. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a vision. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a vision and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a vision. |
| Ability to determine, modify, and interpret the status or condition of a vision. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a vision. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a vision. |
| Ability to define, articulate, and control an end toward which effort is or should be directed. |

| |
|---|
| Ability to establish and identify a goal. |
| Ability to declare a goal. |
| Ability to recognize a goal. |
| Ability to conceptualize, develop, and express a goal. |
| Ability to define, interpret, and enforce the right to view, use, or modify a goal or its component parts. |
| Ability to determine access rights limitations for a goal. |
| Ability to understand the access rights limitations for a goal. |
| Ability to impose access rights limitations for a goal. |
| Ability to determine if a goal is appropriate, proper, and correct. |
| Ability to associate a goal with an objective. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a goal. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a goal and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a goal. |
| Ability to determine, modify, and interpret the status or condition of a goal. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a goal. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a goal. |
| Ability to define, articulate, and prioritize a quantifiable, measurable result that contributes to the realization of a goal. |
| Ability to establish and identify an objective. |
| Ability to declare an objective. |
| Ability to recognize an objective. |
| Ability to conceptualize, develop, and express an objective. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an objective. |
| Ability to identify and define the level of acceptable risk associated with an objective. |
| Ability to identify and define the level of risk associated with an objective. |
| Ability to consider a collective set of risk factors about an objective and represent them from a rationalized perspective. |
| Ability to determine how well an objective is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for an objective. |
| Ability to determine if an objective is exceeding or falling short of an acceptable threshold of performance. |

| |
|---|
| Ability to assess what is causing an objective to underperform. |
| Ability to define, interpret, and enforce the right to view, use, or modify an objective or its component parts. |
| Ability to determine access rights limitations for an objective. |
| Ability to understand the access rights limitations for an objective. |
| Ability to impose access rights limitations for an objective. |
| Ability to determine if an objective is appropriate, proper, and correct. |
| Ability to associate an objective with other business objects. |
| Ability to associate an objective with an objective. |
| Ability to associate an objective with a course of action. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an objective. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an objective and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an objective. |
| Ability to determine, modify, and interpret the status or condition of an objective. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an objective. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an objective. |
| Ability to define and articulate a specific set of activities to be taken to achieve an objective. |
| Ability to establish and identify a course of action. |
| Ability to declare a course of action. |
| Ability to recognize a course of action. |
| Ability to conceptualize, develop, and express a course of action. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a course of action. |
| Ability to identify and define the level of acceptable risk associated with a course of action. |
| Ability to identify and define the level of risk associated with a course of action. |
| Ability to consider a collective set of risk factors about a course of action and represent them from a rationalized perspective. |
| Ability to determine how well a course of action is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a course of action. |
| Ability to determine if a course of action is exceeding or falling short of an acceptable threshold of performance. |

| |
|---|
| Ability to assess what is causing a course of action to underperform. |
| Ability to define, interpret, and enforce the right to view, use, or modify a course of action or its component parts. |
| Ability to determine access rights limitations for a course of action. |
| Ability to understand the access rights limitations for a course of action. |
| Ability to impose access rights limitations for a course of action. |
| Ability to determine and represent the order of courses of action or the activities within a course of action. |
| Ability to determine if a course of action is appropriate, proper, and correct. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a course of action. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a course of action and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a course of action. |
| Ability to determine, modify, and interpret the status or condition of a course of action. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a course of action. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a course of action. |
| Ability to define, validate, assess, and otherwise administer an endorsement by a duly recognized and respected third party that indicates ability, competence, knowledge, provenance, or quality. |
| Ability to establish and identify an accreditation. |
| Ability to declare an accreditation. |
| Ability to recognize an accreditation. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an accreditation. |
| Ability to identify and define the level of risk associated with an accreditation. |
| Ability to identify and define the level of acceptable risk associated with an accreditation. |
| Ability to consider a collective set of risk factors about an accreditation and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an accreditation or its component parts. |
| Ability to determine access rights limitations for an accreditation. |
| Ability to understand the access rights limitations for an accreditation. |
| Ability to impose access rights limitations for an accreditation. |

| |
|---|
| Ability to determine if an accreditation is authentic and legitimate. |
| Ability to determine how well an accreditation is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for an accreditation. |
| Ability to determine if an accreditation is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing an accreditation to underperform. |
| Ability to identify, assess, track, and report on the various stages of an accreditation. |
| Ability to associate an accreditation with other business objects. |
| Ability to associate an accreditation with a competency. |
| Ability to associate an accreditation with a human resource. |
| Ability to associate an accreditation with a job. |
| Ability to associate an accreditation with a partner. |
| Ability to associate an accreditation with a policy. |
| Ability to associate an accreditation with a public sector entity. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an accreditation. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an accreditation and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an accreditation. |
| Ability to determine, modify, and interpret the status or condition of an accreditation. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an accreditation. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an accreditation. |
| Ability to establish, organize, analyze, administer, and report on all aspects of a set of legally binding rights and obligations between two or more legal entities. |
| Ability to establish and identify an agreement. |
| Ability to declare an agreement. |
| Ability to recognize an agreement. |
| Ability to formulate and construct a binding agreement encompassing such things as eligibility, valuation, terms and conditions, period or duration, and termination privileges. |
| Ability to ascertain that a customer or partner is qualified for an agreement. |

Copyright Business Architecture Guild 2025

| |
|---|
| Ability to formulate monetary or non-monetary amounts owed, resulting from the execution of an agreement. |
| Ability to aggregate one or more predefined product or offer prices into a baseline starting point for agreement price finalization. |
| Ability to set specific agreement pricing that considers standard pricing, agreement terms and conditions, and risk. |
| Ability to determine agreement pricing that considers standard pricing, custom pricing, and customer or partner negotiations. |
| Ability to ensure that an agreement conforms to internal and external policies as well as the intentions of the parties. |
| Ability to ascertain that an agreement conforms to the organization's objectives. |
| Ability to determine if an agreement is in accordance with all applicable enterprise policies. |
| Ability to establish, modify, and interpret a legally enforceable condition set forth within the bounds of an agreement. |
| Ability to aggregate one or more predefined product or offer terms into a baseline starting point for agreement terms definition. |
| Ability to set specific agreement terms considering standard terms and risk. |
| Ability to determine agreement terms that consider standard terms, custom terms, and customer or partner negotiations. |
| Ability to associate an agreement term with a policy. |
| Ability to aggregate terms, risks, pricing, and related agreement elements into a finalized, executable form suitable to all parties. |
| Ability to align and validate the collective set of agreement risks, terms, price, and parties as a prelude to finalizing an agreement. |
| Ability to ensure that the structure of an agreement aligns to defined practices in order to ready it for finalization. |
| Ability to capture, represent, analyze, and act upon explicit or implicit inclinations, leanings, likings, predispositions, penchants, or options, expressed formally or informally, as determined or derived from a combination of sources and associated with an agreement. |
| Ability to establish and identify an agreement preference. |
| Ability to derive the meaning of one or a combination of preferences within an agreement or across multiple related agreements. |
| Ability to manage the operation of an agreement from execution to termination and beyond, including amendments, renewals, implementation, notices, responses, termination, and retention. |
| Ability to cause an agreement to be in-force. |
| Ability to cancel or end an agreement in compliance with the terms of an agreement. |
| Ability to update an agreement period or duration thereby extending an agreement in accordance with an agreement terms and conditions. |
| Ability to verify and establish that an agreement is executed in accordance to the terms and conditions, preferences, policy, and good practice. |
| Ability to quantify the terms and preferences that establish a baseline for determining compliance. |

| |
|---|
| Ability to articulate the delta or differences between the interpreted baseline and actual actions taken as a result of or related to an agreement. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an agreement. |
| Ability to identify and define the level of risk associated with an agreement. |
| Ability to identify and define the level of acceptable risk associated with an agreement. |
| Ability to consider a collective set of risk factors about an agreement and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an agreement or its component parts. |
| Ability to determine access rights limitations for an agreement. |
| Ability to understand the access rights limitations for an agreement. |
| Ability to impose access rights limitations for an agreement. |
| Ability to articulate and evaluate a collective set of agreements with the intention of determining the value of, modifying, or optimizing the balance of that collective set of agreements. |
| Ability to determine if a collective set of agreements is meeting the threshold of expressed desires and expectations. |
| Ability to evaluate the performance of a collective set of agreements as input to possible optimization of that portfolio. |
| Ability to associate an agreement with other business objects. |
| Ability to associate an agreement with an agreement. |
| Ability to associate an agreement with an asset. |
| Ability to associate an agreement with a channel. |
| Ability to associate an agreement with a constituent. |
| Ability to associate an agreement with content. |
| Ability to associate an agreement with energy. |
| Ability to associate an agreement with a financial account. |
| Ability to associate an agreement with a government service. |
| Ability to associate an agreement with a human resource. |
| Ability to associate an agreement with an infrastructure. |
| Ability to associate an agreement with a partner. |
| Ability to associate an agreement with a payment. |
| Ability to associate an agreement with a policy. |
| Ability to associate an agreement with a time. |

| |
|---|
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an agreement. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an agreement and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an agreement. |
| Ability to determine, modify, and interpret the status or condition of an agreement. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an agreement. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an agreement. |
| Ability to identify, track, and apply a defined life quality standard to a non-human living thing including an animal, plant, and microorganism that reacts to stimuli, consumes natural resources to grow, thrive, and reproduce. |
| Ability to establish and identify a biological organism. |
| Ability to declare a biological organism. |
| Ability to recognize a biological organism. |
| Ability to capture, represent, analyze, and act upon the wants, needs, inclinations, leanings, likings, predispositions, and penchants of a biological organism, including the ability to determine preferred climates, environments, and food sources. |
| Ability to ascertain biological organism interests based on historical patterns, environmental leanings, and actions. |
| Ability to review biological organism preferences and articulate them in a way that can be acted upon for its preservation or related actions. |
| Ability to reflect the overall trajectory of a biological organism or population of biological organisms and direct action accordingly. |
| Ability to establish a scale or model that may be used to place a biological organism in its evolution. |
| Ability to assess where a biological organism is in its evolutionary scale, including its growth stage, maturity stage, endangered stage, or extinct stage. |
| Ability to define and maintain categories of biological organisms that facilitate a common understanding of the lifecycle, needs, environmental role, and impact of the biological organism. |
| Ability to establish and identify a category of biological organism. |
| Ability to define a top-down and bottom-up series of decompositions to represent parent-child relationships across biological organisms. |
| Ability to associate a biological organism with a specific family, species, or related classification. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a biological organism. |
| Ability to identify and define the level of risk associated with a biological organism. |

| |
|---|
| Ability to identify and define the level of acceptable risk associated with a biological organism. |
| Ability to consider a collective set of risk factors about a biological organism and represent them from a rationalized perspective. |
| Ability to articulate the dangers posed by and dangers posed to a biological organism or group thereof, and to identify responses to these dangers. |
| Ability to determine the exposures to dangers or hazards a biological organism presents to the environment or other biological organisms. |
| Ability to determine the exposures to dangers or hazards a biological organism may be exposed to by environmental changes or other biological organisms. |
| Ability to respond in kind to dangers posed by a biological organism and dangers posed to a biological organism. |
| Ability to define, interpret, and enforce the right to view, use, or modify a biological organism or its component parts. |
| Ability to define and impose limitations of access rights for a biological organism. |
| Ability to understand the access rights limitations for a biological organism or set of biological organisms. |
| Ability to impose access rights limitations for a biological organism. |
| Ability to associate a biological organism with other business objects. |
| Ability to associate a biological organism with a biological organism. |
| Ability to associate a biological organism with a case. |
| Ability to associate a biological organism with a constituent. |
| Ability to associate a biological organism with a conveyor. |
| Ability to associate a biological organism with energy. |
| Ability to associate a biological organism with a health condition. |
| Ability to associate a biological organism with an incident. |
| Ability to associate a biological organism with an initiative. |
| Ability to associate a biological organism with legislation. |
| Ability to associate a biological organism with a license. |
| Ability to associate a biological organism with a location. |
| Ability to associate a biological organism with a market. |
| Ability to associate a biological organism with a material. |
| Ability to associate a biological organism with a natural resource. |
| Ability to associate a biological organism with an operation. |

| Ability to associate a biological organism with an order. |
| Ability to associate a biological organism with a partner. |
| Ability to associate a biological organism with a plan. |
| Ability to associate a biological organism with a policy. |
| Ability to associate a biological organism with a route. |
| Ability to associate a biological organism with a strategy. |
| Ability to associate a biological organism with a trip. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a biological organism. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a biological organism and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a biological organism. |
| Ability to determine, modify, and interpret the status or condition of a biological organism. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a biological organism. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a biological organism. |
| Ability to determine that a biological organism is what it is perceived to be based on a defined confidence level. |
| Ability to declare that a biological organism is what it is perceived to be. |
| Ability to ascertain the degree to which a biological organism is authenticated. |
| Ability to define the degree of confidence needed to authenticate a biological organism for various scenarios. |
| Ability to define, determine, and assign biological organism access features, attributes, and characteristics. |
| Ability to ascribe authorization to a biological organism. |
| Ability to describe the nature of biological organism authorization classifications, for example, authorization levels, ratings, or groups. |
| Ability to ascertain authorization of a biological organism. |
| Ability to define, research, assess, recommend a plan of action for, act on, report on, resolve, and otherwise address an instance of a need or demand that requires resolution, such as in the context of legal, social welfare, healthcare, or related government services. |
| Ability to establish and identify a case. |
| Ability to declare a case. |

| |
|---|
| Ability to recognize a case. |
| Ability to bound the range of activities and concerns addressed by the case and the ability to constrain the case to operate within that boundary. |
| Ability to define the conditions and factors used to resolve the case, including but not limited to, a period of time. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a case. |
| Ability to identify and define the level of risk associated with a case. |
| Ability to identify and define the level of acceptable risk associated with a case. |
| Ability to consider a collective set of risk factors about a case and represent them from a rationalized perspective. |
| Ability to define and make the most effective use of the case spend in comparison to the value anticipated to be delivered. |
| Ability to project the value being delivered through a case. |
| Ability to project the required spend to deliver a case. |
| Ability to define, interpret, and enforce the right to view, use, or modify a case or its component parts. |
| Ability to determine access rights limitations for a submission. |
| Ability to understand the access rights  limitations for a case. |
| Ability to impose access rights limitations for a case. |
| Ability to define, track, and articulate the series of stages of a case from creation through to retirement, which may be resolution, or reaching an inactive state for lack of ability to resolve the case. |
| Ability to manage the introductory stages of a case. |
| Ability to move a case forward according to the rules or practices that govern the case. |
| Ability to manage the final stages of a case, including recording final decisions and outcome. |
| Ability to associate a case with other business objects. |
| Ability to associate a case with a case. |
| Ability to associate a case with a constituent. |
| Ability to associate a case with a channel. |
| Ability to associate a case with a human resource. |
| Ability to associate a case with a public sector entity. |
| Ability to associate a case with a government service. |
| Ability to associate a case with a work item. |
| Ability to associate a case with a message. |

| Ability to associate a case with a payment. |
| Ability to associate a case with a partner. |
| Ability to associate a case with a plan. |
| Ability to associate a case with a policy. |
| Ability to associate a case with a schedule. |
| Ability to associate a case with a submission. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a case. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a case and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a case. |
| Ability to determine, modify, and interpret the status or condition of a case. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a case. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a case. |
| Ability to establish, analyze, and utilize a digital, analog, or physical conduit through which products, related services, or communications are delivered or received, including the internet, phone, delivery service, satellite, radio, or physical means. |
| Ability to establish and identify a channel. |
| Ability to declare a channel. |
| Ability to recognize a channel. |
| Ability to identify, describe, and analyze the appropriate market need for a new or enhanced channel. |
| Ability to design, model, and package a channel. |
| Ability to take the conceptualization of an idea about a channel while considering its predetermined specifications in order to define the channel's features and required standards of performance. |
| Ability to create approximations of the channel in order to determine feasibility and/or applicability of the channel. |
| Ability to prepare and disseminate a channel into the marketplace. |
| Ability to determine how well a channel is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a channel. |
| Ability to determine if a channel is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a channel to underperform. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a channel. |

| |
|---|
| Ability to identify and define the level of risk associated with a channel. |
| Ability to identify and define the level of acceptable risk associated with a channel. |
| Ability to consider a collective set of risk factors about a channel and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a channel or its component parts. |
| Ability to determine access rights limitations for a channel. |
| Ability to understand the access rights limitations for a channel. |
| Ability to impose access rights limitations for a channel. |
| Ability to associate a channel with other business objects. |
| Ability to associate a channel with a channel. |
| Ability to associate a channel with a location. |
| Ability to associate a channel with a policy. |
| Ability to associate a channel with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a channel. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a channel and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a channel. |
| Ability to determine, modify, and interpret the status or condition of a channel. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a channel. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a channel. |
| Ability to leverage various calculations to derive analytics for a channel. |
| Ability to evaluate and ascertain commonalities across a set of analytical information for a channel. |
| Ability to identify, track, and respond to a demand or request to indemnify constituents under the terms of an agreement. |
| Ability to establish and identify a claim. |
| Ability to verify that an incident or a claim is covered by the terms and conditions of an agreement. |
| Ability to determine that the date of loss falls within the effective and expiration date range of the covering agreement. |
| Ability to determine that the covering agreement has the necessary coverage(s) to properly address the incident or claim. |
| Ability to determine the limit and/or deductible amounts that apply to the incident or claim. |
| Ability to choose the method of claim restitution. |

| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a claim and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a claim. |
| Ability to determine, modify, and interpret the status or condition of a claim. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a claim. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a claim. |
| Ability to identify, engage with, collect information on, understand the needs of, monitor, update, and validate the status of an individual or entity relative to an organization's sphere of responsibility. |
| Ability to establish and identify a constituent. |
| Ability to declare a constituent. |
| Ability to recognize a constituent. |

| |
|---|
| Ability to capture, represent, analyze, and act upon explicit or implicit wants, needs, inclinations, leanings, likings, predispositions, penchants, or options — expressed formally or informally — as determined or derived from a combination of sources and associated with a constituent. |
| Ability to characterize the preferences that are related to a constituent. |
| Ability to understand and determine the meanings or intentions of the differences in preference patterns of a constituent. |
| Ability to ensure that the organization acknowledges and complies with constituent-related preferences, particularly where those preferences are explicitly defined by the constituent. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a constituent. |
| Ability to identify and define the level of risk associated with a constituent. |
| Ability to identify and define the level of acceptable risk associated with a constituent. |
| Ability to consider a collective set of risk factors about a constituent and represent them from a rationalized perspective. |
| Ability to identify and assess the dangers posed by, and dangers posed to, a constituent or group thereof. |
| Ability to define and create a response to identified dangers posed by, and dangers posed to, a constituent or group thereof. |
| Ability to determine that a constituent is who they claim to be based on a defined confidence level. |
| Ability to define the degree of confidence needed to authenticate a constituent for various scenarios. |
| Ability to ascertain the degree to which a constituent is authenticated. |
| Ability to validate a constituent against their genuine identity. |
| Ability to define, interpret, and enforce the laws that control who or what entity has access to a constituent, or the component parts of a constituent entity. |
| Ability to determine access rights limitations for a constituent. |
| Ability to understand the access rights limitations for a constituent. |
| Ability to impose access rights limitations for a constituent. |
| Ability to define, determine, and assign constituent access features, attributes, and characteristics. |
| Ability to ascribe authorization to a constituent. |
| Ability to describe the nature of constituent authorization classifications, for example, authorization levels, ratings, or groups. |
| Ability to ascertain authorization of a constituent. |
| Ability to identify, organize, aggregate, segment, and prioritize a collection of constituents. |
| Ability to classify and analyze constituents based on specific attributes. |
| Ability to establish and identify a constituent segment. |

| Ability to declare a constituent segment. |
| Ability to recognize a constituent segment. |
| Ability to determine the properties associated with or describing a constituent segment. |
| Ability to determine the relative importance of constituent segments to organization objectives. |
| Ability to group constituents. |
| Ability to define, describe, categorize, and prioritize constituent demands, desires, or expectations, which can take varying forms or be represented at varying levels of specificity. |
| Ability to associate a constituent with other business objects. |
| Ability to associate a constituent with a channel. |
| Ability to associate a constituent with a constituent. |
| Ability to associate a constituent with a government service. |
| Ability to associate a constituent with a human resource. |
| Ability to associate a constituent with an initiative. |
| Ability to associate a constituent with a language. |
| Ability to associate a constituent with legislation. |
| Ability to associate a constituent with a location. |
| Ability to associate a constituent with a market. |
| Ability to associate a constituent with a message. |
| Ability to associate a constituent with a partner. |
| Ability to associate a constituent with a plan. |
| Ability to associate a constituent with a policy. |
| Ability to associate a constituent with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a constituent. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a constituent and their relationships. |
| Ability to determine, modify, and interpret the category or classification of a constituent. |
| Ability to determine, modify, and interpret the status or condition of a constituent. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a constituent. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a constituent. |

| |
|---|
| Ability to design, procure, maintain, and dispose of any variety of an apparatus or assembly, whether human or robot-piloted, that has the capacity to transport people and physical items, such as animals, goods, or other assets. |
| Ability to establish and identify a conveyor. |
| Ability to declare a conveyor. |
| Ability to recognize a conveyor. |
| Ability to conceptualize and specify features that a conveyor must have, for which conceptualization may take the form of drawings, blueprints, and other representations. |
| Ability to define, track, and articulate the series of stages of a conveyor, between the time it is acquired or created until it is destroyed or disposed of. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a conveyor. |
| Ability to identify and define the level of risk associated with a conveyor. |
| Ability to identify and define the level of acceptable risk associated with a conveyor. |
| Ability to consider a collective set of risk factors about a conveyor and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a conveyor or its component parts. |
| Ability to determine access rights limitations for a conveyor. |
| Ability to understand the access rights limitations for a conveyor. |
| Ability to impose access rights limitations for a conveyor. |
| Ability to assess a conveyor to assign a monetary value to it. |
| Ability to determine if a conveyor is the proper and correct conveyor, as compared to a set of internal requirements. |
| Ability to direct the movement of a conveyor, including remotely or algorithmically operating a connected autonomous vehicle. |
| Ability to associate a conveyor with other business objects. |
| Ability to associate a conveyor with an asset. |
| Ability to associate a conveyor with a case. |
| Ability to associate a conveyor with a constituent. |
| Ability to associate a conveyor with a dispute. |
| Ability to associate a conveyor with evidence. |
| Ability to associate a conveyor with a human resource. |
| Ability to associate a conveyor with a location. |
| Ability to associate a conveyor with a material. |

| |
|---|
| Ability to associate a conveyor with an operation. |
| Ability to associate a conveyor with a partner. |
| Ability to associate a conveyor with a plan. |
| Ability to associate a conveyor with a route. |
| Ability to associate a conveyor with a trip. |
| Ability to associate a conveyor with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a conveyor. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a conveyor and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a conveyor. |
| Ability to determine, modify, and interpret the status or condition of a conveyor. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a conveyor. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a conveyor. |
| Ability to customize and otherwise prepare a conveyor for use in context of an environment or situation, which includes setting options, making adjustments, and otherwise making or keeping it ready for use. |
| Ability to determine that a conveyor is that which it claims to be based on a defined confidence level. |
| Ability to declare that a conveyor is that which it claims to be. |
| Ability to ascertain the degree to which a conveyor is authenticated. |
| Ability to define the degree of confidence needed to authenticate a conveyor for various scenarios. |
| Ability to ascribe authorization to a conveyor. |
| Ability to ascertain authorization of a conveyor. |
| Ability to define, determine, and assign conveyor access features, attributes, and characteristics. |
| Ability to describe the nature of conveyor authorization classifications, for example, authorization levels, ratings, or groups. |
| Ability to determine how well a conveyor is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a conveyor. |
| Ability to determine if a conveyor is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a conveyor to underperform. |
| Ability to create, track, and resolve an argument, disagreement, or protest of perceived injustice. |
| Ability to establish and identify a dispute. |

| Ability to associate a dispute with an agreement. |
| Ability to associate a dispute with a case. |
| Ability to associate a dispute with a claim. |
| Ability to associate a dispute with a constituent. |
| Ability to associate a dispute with a partner. |
| Ability to associate a dispute with a standard. |
| Ability to associate a dispute with a vote. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a dispute. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a dispute and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a dispute. |
| Ability to determine, modify, and interpret the status or condition of a dispute. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a dispute. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a dispute. |
| Ability to organize, manage the reserves of, distribute, conserve, control, and monitor the generation and use of sources of power. |
| Ability to establish and identify a source or form of energy. |
| Ability to declare a source or form of energy. |
| Ability to recognize a source or form of energy. |
| Ability to measure the energy generated against various standards and norms, such as to ensure resources are developed in a safe and sustainable manner. |
| Ability to establish a threshold for various attributes of energy production. |
| Ability to determine variance between actual and target production levels. |
| Ability to measure the amount of energy per unit of time disseminated, transmitted, and delivered against various standards and norms, such as to ensure resources are developed and consumed in a safe and sustainable manner. |
| Ability to establish a threshold for various attributes of energy distribution and transmission. |
| Ability to determine variance between actual and target distribution levels. |

| |
|---|
| Ability to measure energy reserves against various standards and norms, such as to ensure resources are developed and consumed in a safe and sustainable manner. |
| Ability to establish a threshold for various attributes of energy storage. |
| Ability to determine variance between actual and target storage levels. |
| Ability to establish and adjust a prediction of future energy supply and demand based on, but not limited to, history and market trends. |
| Ability to create a description of a future state of supply and demand of energy. |
| Ability to model and articulate an energy forecast that may be interpreted and leveraged where applicable. |
| Ability to determine that an energy forecast is accurate within the constraints of the forecasting model. |
| Ability to articulate and evaluate a collective set of sources of power associated with legislation and policy with the intention of determining the value of, modifying, or optimizing the balance of that collective set. |
| Ability to define the composition and make-up of the portfolio of energy sources. |
| Ability to evaluate the performance of the energy portfolio to meet defined goals and objectives, such as sustainable and secure production. |
| Ability to evaluate and prioritize a collection of sources of energy within a portfolio, based on predetermined attributes, such as cost, benefit, and risk. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with energy. |
| Ability to identify and define the level of risk associated with sources or lifecycle of energy. |
| Ability to identify and define the level of acceptable risk associated with a source or form energy. |
| Ability to consider a collective set of risk factors about energy and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, examine, develop, use, modify, distribute, capture, store, and deliver energy or its component parts. |
| Ability to determine access rights limitations for energy. |
| Ability to understand the access rights limitations for energy. |
| Ability to impose access rights limitations for energy. |
| Ability to define, track, and articulate the series of stages of energy production, delivery, consumption, and reclamation, from creation through transmission to possible capture and re-use. |
| Ability to associate energy with other business objects. |
| Ability to associate a form of energy with an agreement term. |
| Ability to associate a form of energy with an incident. |

| Ability to determine, modify, and interpret the category or classification of evidence. |
| Ability to determine, modify, and interpret the status or condition of evidence. |
| Ability to identify, record, and represent a chronological order of events and actions associated with evidence. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of evidence. |
| Ability to administer, valuate, and report on a tradeable security, such as stocks, bonds, bills of exchange, futures, options, evidence of ownership, and cash. |
| Ability to establish and identify a financial instrument. |
| Ability to declare a financial instrument. |
| Ability to determine and assign the monetary worth of a financial instrument, including mark-to-market and other valuation mechanisms at a point in time. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a financial instrument. |
| Ability to identify and define the level of risk associated with a financial instrument. |
| Ability to identify and define the level of acceptable risk associated with a financial instrument. |
| Ability to consider a collective set of risk factors about a financial instrument and represent them from a rationalized perspective. |
| Ability to hold financial instruments in safekeeping on behalf of a third party. |
| Ability to administer the correct allocation of entitlements to a constituent arising from government actions on financial instruments. |
| Ability to define, interpret, and enforce the right to view, use, or modify a financial instrument or its component parts. |
| Ability to determine access rights limitations for a financial instrument. |

| Ability to associate a financial instrument with other business objects. |
| Ability to associate a financial instrument with a financial instrument. |
| Ability to associate a financial instrument with a market. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a financial instrument. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a financial instrument and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a financial instrument. |
| Ability to determine, modify, and interpret the status or condition of a financial instrument. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a financial instrument. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a financial instrument. |
| Ability to conceptualize, design, develop, bundle, source, maintain, and retire a named combination of goods, doing-of-work-for-others, and entitlements that can be offered to constituents. |
| Ability to establish and identify a government service. |
| Ability to declare a government service. |
| Ability to recognize a government service. |
| Ability to control, process, organize, and analyze decisions regarding a collective set of government services the organization provides to meet its objectives. |
| Ability to invent or formulate an idea for a new or enhanced government service. |
| Ability to identify and describe the appropriate market need for the new or enhanced government service. |
| Ability to identify, describe, and prioritize the specifications required by the government service. |
| Ability to articulate an idea for a new government service or government service enhancement. |
| Ability to move a product from conceptualization through design to its finished state. |
| Ability to take the conceptualization of an idea about a product or service while considering its predetermined specifications in order to define the product's or service's features and required standards of performance, which may include drawings, blueprints, and other representations. |

| |
|---|
| Ability to create approximations of the whole product or service or particular parts, in order to determine feasibility and/or applicability of the product or service. |
| Ability to create mock-ups of the whole product or service or particular parts in order to determine feasibility and/or applicability of the product or service. |
| Ability to prepare and disseminate a product or service into the marketplace or area of jurisdiction. |
| Ability to identify, establish, and manage alternative origins of a government service or its component parts. |
| Ability to determine if a government service is proper and correct as compared to a set of internal requirements. |
| Ability to set and maintain a current price list, with ranges and optional terms, associated with a government service, including standard and non-standard pricing. |
| Ability to assess price options based on what a targeted market or markets will bear. |
| Ability to assess price options based on estimated product or service expenditures and distribution expenditures. |
| Ability to formalize a product or service price that considers expenditures, market conditions, and related consideration. |
| Ability to identify, represent, and evolve incremental instances of a government service offering. |
| Ability to manage and articulate the differences among various versions of the same product or service. |
| Ability to ensure the smooth transition from one version of a product or service to another, including scenarios where this is not possible. |
| Ability to define, track, and articulate the series of stages of a government service from conception through retirement. |
| Ability to manage the introductory stages of a product's or service’s existence. |
| Ability to manage the final stages of a product's or service’s existence. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a government service. |
| Ability to identify and define the level of risk associated with a government service. |
| Ability to identify and define the level of acceptable risk associated with a government service. |
| Ability to consider a collective set of risk factors about a government service and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a government service or its component parts. |
| Ability to determine access rights limitations for a government service. |
| Ability to understand the access rights limitations for a government service. |
| Ability to impose access rights limitations for a government service. |
| Ability to adapt a government service to the environment in which it resides or is targeted to reside. |
| Ability to determine how well a government service is meeting specification and objective levels, or delivering against plan. |

| |
|---|
| Ability to determine acceptable or unacceptable levels of performance for a government service. |
| Ability to determine if a government service is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a government service to underperform. |
| Ability to associate a government service with other business objects. |
| Ability to associate a government service with an asset. |
| Ability to associate a government service with a brand. |
| Ability to associate a government service with a channel. |
| Ability to associate a government service with a financial forecast. |
| Ability to associate a government service with a government service. |
| Ability to associate a government service with an intellectual property right. |
| Ability to associate a government service with a location. |
| Ability to associate a government service with a market. |
| Ability to associate a government service with a plan. |
| Ability to associate a government service with a policy. |
| Ability to associate a government service with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a government service. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a government service and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a government service. |
| Ability to determine, modify, and interpret the status or condition of a government service. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a government service. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a government service. |
| Ability to define, determine, diagnose, monitor, track, evaluate, and respond to a state of well-being of a human being or biological organism. |
| Ability to establish and identify a health condition. |
| Ability to declare a health condition. |

| |
|---|
| Ability to recognize a health condition. |
| Ability to discern the overall trajectory of a health condition, for example, of a biological organism or constituent individual or population, and direct action accordingly. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a health condition. |
| Ability to identify and define the level of risk associated with a health condition. |
| Ability to identify and define the level of acceptable risk associated with a health condition. |
| Ability to consider a collective set of risk factors about a health condition and represent them from a rationalized perspective. |
| Ability to identify and assess the dangers posed by a health condition. |
| Ability to define and create a response to identified dangers posed by a health condition. |
| Ability to define, interpret, and enforce the right to view, use, or modify a health condition or its component parts. |
| Ability to determine access rights limitations for a health condition. |
| Ability to understand the access rights limitations for a health condition. |
| Ability to impose access rights limitations for a health condition. |
| Ability to associate a health condition with other business objects. |
| Ability to associate a health condition with a constituent. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a health condition. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a health condition and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a health condition. |
| Ability to determine, modify, and interpret the status or condition of a health condition. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a health condition. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations for one or more health conditions. |
| Ability to identify, define, and track an unplanned disruptive or potentially disruptive experience. |
| Ability to establish and identify an incident. |
| Ability to declare an incident. |
| Ability to recognize an incident. |

| |
|---|
| Ability to assess, track down, and articulate the initiating source of an incident. |
| Ability to constrain the applicability of an incident to other contexts. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an incident. |
| Ability to identify and define the level of risk associated with an incident. |
| Ability to identify and define the level of acceptable risk associated with an incident. |
| Ability to consider a collective set of risk factors about an incident and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an incident or its component parts. |
| Ability to determine access rights limitations for an incident. |
| Ability to understand the access rights limitations for an incident. |
| Ability to impose access rights limitations for an incident. |
| Ability to associate an incident with other business objects. |
| Ability to associate an incident with an interaction. |
| Ability to associate an incident with an agreement. |
| Ability to associate an incident with an asset. |
| Ability to associate an incident with a brand. |
| Ability to associate an incident with a channel. |
| Ability to associate an incident with a constituent. |
| Ability to associate an incident with a financial account. |
| Ability to associate an incident with a financial transaction. |
| Ability to associate an incident with a government service. |
| Ability to associate an incident with a human resource. |
| Ability to associate an incident with an incident. |
| Ability to associate an incident with an initiative. |
| Ability to associate an incident with legislation. |
| Ability to associate an incident with a partner. |
| Ability to associate an incident with a policy. |
| Ability to associate an incident with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an incident. |

| |
|---|
| Ability to determine, modify, and interpret the category or classification of an incident. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an incident and its relationships. |
| Ability to determine, modify, and interpret the status or condition of an incident. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an incident. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an incident. |
| Ability to define, design, maintain, describe, and administer a physical structure or facility, which may include power grids, communication lines, railways, roadways, bridges, tunnels, and pipelines or conduits for water, gas, and power. |
| Ability to establish and identify an infrastructure. |
| Ability to declare an infrastructure. |
| Ability to recognize an infrastructure. |
| Ability to conceptualize and specify features that an infrastructure must have, in which conceptualization may take the form of drawings, blueprints, and other representations. |
| Ability to create mock-ups of a whole infrastructure, or particular parts, in order to determine feasibility and/or applicability of the design. |
| Ability to determine how well an infrastructure is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for an infrastructure. |
| Ability to determine if an infrastructure is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing an infrastructure to underperform. |
| Ability to make decisions concerning an infrastructure over time, between the time they are acquired or created until they are destroyed, and otherwise end their status as an asset. |
| Ability to construct an infrastructure. |
| Ability to bring an infrastructure into use. |
| Ability to remove an infrastructure from active use. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an infrastructure. |
| Ability to identify and define the level of risk associated with an infrastructure. |
| Ability to identify and define the level of acceptable risk associated with an infrastructure. |
| Ability to consider a collective set of risk factors about an infrastructure and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an infrastructure or its component parts. |

| |
|---|
| Ability to determine access rights limitations for an infrastructure. |
| Ability to understand the access rights limitations for an infrastructure. |
| Ability to impose access rights limitations for an infrastructure. |
| Ability to associate an infrastructure with other business objects. |
| Ability to associate an infrastructure with a competency. |
| Ability to associate an infrastructure with an infrastructure. |
| Ability to associate an infrastructure with an initiative. |
| Ability to associate an infrastructure with an investment portfolio. |
| Ability to associate an infrastructure with a location. |
| Ability to associate an infrastructure with a partner. |
| Ability to associate an infrastructure with a plan. |
| Ability to associate an infrastructure with a policy. |
| Ability to associate an infrastructure with a public sector entity. |
| Ability to associate an infrastructure with a work item. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an infrastructure. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an infrastructure and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an infrastructure. |
| Ability to determine, modify, and interpret the status or condition of an infrastructure. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an infrastructure. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an infrastructure. |
| Ability to define, organize, direct, assess, and control a coordinated collection of temporary endeavors undertaken to create a unique outcome. |
| Ability to establish and identify an initiative. |
| Ability to declare an initiative. |
| Ability to recognize an initiative. |
| Ability to bound the range of activities and concerns addressed by the initiative and the ability to constrain the initiative to operate within that boundary. |

| |
|---|
| Ability to determine how well an initiative is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for an initiative. |
| Ability to determine if an initiative is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing an initiative to underperform. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an initiative. |
| Ability to identify and define the level of risk associated with an initiative. |
| Ability to identify and define the level of acceptable risk associated with an initiative. |
| Ability to consider a collective set of risk factors about an initiative and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an initiative or its component parts. |
| Ability to determine access rights limitations for an initiative. |
| Ability to understand the access rights limitations for an initiative. |
| Ability to impose access rights limitations for an initiative. |
| Ability to associate an initiative with other business objects. |
| Ability to associate an initiative with content. |
| Ability to associate an initiative with a financial forecast. |
| Ability to associate an initiative with a financial position. |
| Ability to associate an initiative with a human resource. |
| Ability to associate an initiative with an investment portfolio. |
| Ability to associate an initiative with a partner. |
| Ability to associate an initiative with a policy. |
| Ability to associate an initiative with a strategy. |
| Ability to associate an initiative with a work item. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an initiative. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an initiative and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an initiative. |
| Ability to determine, modify, and interpret the status or condition of an initiative. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an initiative. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an initiative. |

| |
|---|
| Ability to request, define, approve, evolve, monitor, evaluate the effects of, and determine compliance with a set of authoritative directives that include laws or related statutory instruments. |
| Ability to establish and identify legislation. |
| Ability to declare legislation. |
| Ability to recognize legislation. |
| Ability to shape the intention and impact of an item of legislation. |
| Ability to understand the meaning and impacts of legislation and its applicability to a domain, entity, or constituents. |
| Ability to constrain the applicability or range of effect and impact of an item of legislation. |
| Ability to formulate and construct a legislative bill encompassing elements, such as but not limited to, the title, pre-amble, enacting clause, core clause and sub clauses, interpretation provisions, coming-into-force provisions, and schedules. |
| Ability to determine if an item of legislation is of high integrity and accuracy, appropriate to a target, and generally a fit for its intended purpose. |
| Ability to determine if a constituent is conforming to enacted legislation. |
| Ability to guide, assess, and track the different stages legislation goes through from initial consideration through to eventual ratification and enactment into law or repeal. |
| Ability to manage the activities required to change the status on an item to being in-force. |
| Ability to manage the activities required to change the status on an item from being in-force to no longer being in-force. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with legislation. |
| Ability to identify and define the level of risk associated with legislation. |
| Ability to identify and define the level of acceptable risk associated with legislation. |
| Ability to consider a collective set of risk factors about legislation and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify legislation or its component parts. |
| Ability to determine access rights limitations for legislation. |
| Ability to understand the access rights limitations for legislation. |
| Ability to impose access rights limitations for legislation. |
| Ability to associate legislation with other business objects. |
| Ability to associate legislation with an agreement. |
| Ability to associate legislation with an event. |
| Ability to associate legislation with an intellectual property right. |

| |
|---|
| Ability to associate legislation with a language. |
| Ability to associate legislation with legislation. |
| Ability to associate legislation with a location. |
| Ability to associate legislation with a partner. |
| Ability to associate legislation with a policy. |
| Ability to associate legislation with a public sector entity. |
| Ability to associate legislation with research. |
| Ability to associate legislation with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about legislation. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about legislation and its relationships. |
| Ability to determine, modify, and interpret the category or classification of legislation. |
| Ability to determine, modify, and interpret the status or condition of legislation. |
| Ability to identify, record, and represent a chronological order of events and actions associated with legislation. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of legislation. |
| Ability to identify, analyze, track, and administer an authorization to perform a regulated activity, awarded by duly recognized governmental agency or third party, applied to an individual or organization, to engage in an activity, such as fishing, or use of regulated objects, such as modes of transportation or hazardous materials. |
| Ability to establish and identify a license. |
| Ability to declare a license. |
| Ability to recognize a license. |
| Ability to create a license that is fit for purpose. |
| Ability to formulate and construct a license encompassing such things as levels of risk, pricing, terms and conditions, period, duration, and termination criteria. |
| Ability to demonstrate that the conditions that the applicant must meet in order to qualify for or be entitled to the license have been met. |
| Ability to identify, set, evaluate, assess, and administer the activities associated with the monetary amount owed for a license. |
| Ability to specify the elements in the fee structure of the license and associating a cost, monetary or non-monetary, to those elements. |
| Ability to ensure that the formulation of the monetary amount owed conforms to internal and external policies. |
| Ability to formalize a product price that considers expenditures, market conditions, and related consideration. |

Copyright Business Architecture Guild 2025

| |
|---|
| Ability to aggregate terms, constraints, pricing, and related license elements into a finalized, executable form suitable to all parties. |
| Ability to align and validate the collective set of license terms, constraints, price, and parties as a prelude to finalizing a license. |
| Ability to ensure that the structure of a license aligns to defined practices in order to ready it for finalization. |
| Ability to identify, assess, track, and report on the various stages of license evolution. |
| Ability to cause a license to be in-force. |
| Ability to update a license period or duration thereby extending the license in accordance with the license terms and conditions. |
| Ability to cancel or end a license in compliance with the terms of the license. |
| Ability to demonstrate that a license is fit for its intended use according to a defined set of policies. |
| Ability to ensure that the license conforms to internal and external policies and regulations as well as the intentions of the parties. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a license. |
| Ability to identify and define the level of risk associated with a license. |
| Ability to identify and define the level of acceptable risk associated with a license. |
| Ability to consider a collective set of risk factors about a license and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a license or its component parts. |
| Ability to determine access rights limitations for a license. |
| Ability to understand the access rights limitations for a license. |
| Ability to impose access rights limitations for a license. |
| Ability to associate a license with other business objects. |
| Ability to associate a license with a constituent. |
| Ability to associate a license with a partner. |
| Ability to associate a license with a channel. |
| Ability to associate a license with a license. |
| Ability to associate a license with a material. |
| Ability to associate a license with a financial account. |
| Ability to associate a license with a policy. |
| Ability to associate a license with a public sector entity. |
| Ability to associate a license with a time. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a license. |

| |
|---|
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a license and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a license. |
| Ability to determine, modify, and interpret the status or condition of a license. |

Ability to identify, record, and represent a chronological order of events and actions associated with a license.

Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a license.

| |
|---|
| Ability to establish, modify, and interpret a legally enforceable condition set forth within the bounds of a license. |
| Ability to establish and identify a license term. |
| Ability to declare a license term. |
| Ability to recognize a license term. |
| Ability to recognize a license term. |
| Ability to set specific license terms considering standard terms and risk. |
| Ability to define, interpret, and enforce the right to view, use, or modify a license term or its component parts. |
| Ability to determine access rights limitations for a license term. |
| Ability to understand the access rights limitations for a license term. |
| Ability to impose access rights limitations for a license term. |
| Ability to associate a license term with other business objects. |
| Ability to associate a license term with a partner. |
| Ability to associate a license term with a license term. |
| Ability to determine license terms that consider standard terms, custom terms, and constituent or partner negotiations. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a license term. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a license term and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a license term. |
| Ability to determine, modify, and interpret the status or condition of a license term. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a license term. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a license term. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a license term. |
| Ability to identify and define the level of risk associated with a license term. |

Copyright Business Architecture Guild 2025

| |
|---|
| Ability to identify and define the level of acceptable risk associated with a license term. |
| Ability to consider a collective set of risk factors about a license term and represent them from a rationalized perspective. |
| Ability to identify, track, set quality standards for, and equitably distribute food, ingredients, chemicals, waste, and other physical elements used to enable an outcome including sustaining life, the growing of crops, the construction of assets and infrastructure, and the powering of equipment and conveyors. |
| Ability to establish and identify a material. |
| Ability to declare a material. |
| Ability to recognize a material. |
| Ability to verify material to specification. |
| Ability to plan, organize, execute, and control material used, on hand, or backlogged. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a material. |
| Ability to identify and define the level of risk associated with a material. |
| Ability to identify and define the level of acceptable risk associated with a material. |
| Ability to consider a collective set of risk factors about a material and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a material or its component parts. |
| Ability to determine access rights limitations for a material. |
| Ability to understand the access rights limitations for a material. |
| Ability to impose access rights limitations for a material. |
| Ability to associate a material with other business objects. |
| Ability to associate a material with a channel. |
| Ability to associate a material with a location. |
| Ability to associate a material with a partner. |
| Ability to associate a material with a plan. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a material. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a material and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a material. |
| Ability to determine, modify, and interpret the status or condition of a material. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a material. |

| |
|---|
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations for one or more materials. |
| Ability to identify, track, remediate, contain, regulate, and sustain matter that can occur in nature. |
| Ability to establish and identify a natural resource. |
| Ability to declare a natural resource. |
| Ability to recognize a natural resource. |
| Ability to define and maintain classifications, identification, and nomenclature of natural resources to facilitate common understanding and practice. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a natural resource. |
| Ability to identify and define the level of risk associated with a natural resource. |
| Ability to identify and define the level of acceptable risk associated with a natural resource. |
| Ability to consider a collective set of risk factors about a natural resource and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a natural resource or its component parts. |
| Ability to determine access rights limitations for a natural resource. |
| Ability to understand the access rights limitations for a natural resource. |
| Ability to impose access rights limitations for a natural resource. |
| Ability to identify, monitor, and report on natural resource life stages from raw matter extraction including conversion, use, re-use, recycling, transportation, waste disposal to the end of life, and direct actions accordingly. |
| Ability to associate a natural resource with other business objects. |
| Ability to associate a natural resource with a case. |
| Ability to associate a natural resource with a geographic space. |
| Ability to associate a natural resource with an incident. |
| Ability to associate a natural resource with an initiative. |
| Ability to associate a natural resource with legislation. |
| Ability to associate a natural resource with a location. |
| Ability to associate a natural resource with an operation. |

| |
|---|
| Ability to associate a natural resource with a plan. |
| Ability to associate a natural resource with a policy. |
| Ability to associate a natural resource with a route. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a natural resource. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a natural resource and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a natural resource. |
| Ability to determine, modify, and interpret the status or condition of a natural resource. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a natural resource. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a natural resource. |
| Ability to plan, direct, monitor, organize, control, and report on a set of connected arcs and nodes that may be associated with infrastructure, assets, locations, routes, and other business objects. |
| Ability to establish and identify a network. |
| Ability to declare a network. |
| Ability to recognize a network. |
| Ability to conceptualize, specify, and model features that a network must have. |
| Ability to identify and describe the appropriate needs for network changes. |
| Ability to define the network's features and configuration, which may include drawings, blueprints, and other representations. |
| Ability to create approximations of a network or particular parts in order to determine feasibility and/or applicability of the design. |
| Ability to create mock-ups of a network in order to determine feasibility and/or applicability of the network. |
| Ability to make decisions concerning a network over time, between the time it is created until it is destroyed or removed. |
| Ability to bring a network into use. |
| Ability to remove a network from active use. |
| Ability to configure a network. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a network. |
| Ability to identify and define the level of risk associated with a network. |
| Ability to identify and define the level of acceptable risk associated with a network. |
| Ability to consider a collective set of risk factors about a network and represent them from a rationalized perspective. |

| |
|---|
| Ability to define, interpret, and enforce the right to view, use, or modify a network or its component parts. |
| Ability to determine access rights limitations for a network. |
| Ability to understand the access rights limitations for a network. |
| Ability to impose access rights limitations for a network. |
| Ability to determine how well a network is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a network. |
| Ability to determine if a network is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a network to underperform. |
| Ability to plan, direct, monitor, organize, control, and report on a defined connection between nodes in a network. |
| Ability to establish and identify a network arc. |
| Ability to declare a network arc. |
| Ability to recognize a network arc. |
| Ability to define, interpret, and enforce the right to view, use, or modify a network arc or its component parts. |
| Ability to determine access rights limitations for a network arc. |
| Ability to understand the access rights limitations for a network arc. |
| Ability to impose access rights limitations for a network arc. |
| Ability to determine how well a network arc is meeting specification and objective levels, or delivering against plan. |
| Ability to associate a network arc with other business objects. |
| Ability to associate a network arc with a network node. |
| Ability to determine, modify, and interpret the category or classification of a network arc. |
| Ability to determine, modify, and interpret the status or condition of a network arc. |
| Ability to plan, direct, monitor, organize, control, and report on a connection point in a network. |
| Ability to establish and identify a network node. |
| Ability to declare a network node. |
| Ability to recognize a network node. |
| Ability to define, interpret, and enforce the right to view, use, or modify a network node or its component parts. |
| Ability to determine access rights limitations for a network node. |
| Ability to understand the access rights limitations for a network node. |

| |
|---|
| Ability to impose access rights limitations for a network node. |
| Ability to determine how well a network node is meeting specification and objective levels, or delivering against plan. |
| Ability to associate a network node with other business objects. |
| Ability to associate a network node with a plan. |
| Ability to determine, modify, and interpret the category or classification of a network node. |
| Ability to determine, modify, and interpret the status or condition of a network node. |
| Ability to associate a network with other business objects. |
| Ability to associate a network with an asset. |
| Ability to associate a network with a geographic space. |
| Ability to associate a network with a location. |
| Ability to associate a network with a network. |
| Ability to associate a network with a plan. |
| Ability to associate a network with a policy. |
| Ability to associate a network with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a network. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a network and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a network. |
| Ability to determine, modify, and interpret the status or condition of a network. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a network. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations for a network. |
| Ability to define, instantiate, run, monitor, report on, control, secure, terminate, and evaluate an orchestration of work to achieve a specific objective constrained by time and location, which may include, for example, transportation center, monitoring station, law enforcement, or administrative shift cycles across government. |
| Ability to establish and identify an operation. |
| Ability to declare an operation. |
| Ability to recognize an operation. |
| Ability to take the conceptualization of an idea about an operation while considering its predetermined specifications in order to define the operation's features and required standards of performance, which may include drawings, blueprints, and other representations. |

| |
|---|
| Ability to determine how well an operation is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for an operation. |
| Ability to determine if an operation is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing an operation to underperform. |
| Ability to manage the state transitions of an operation. |
| Ability to start an operation. |
| Ability to temporarily halt or permanently end an operation. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an operation. |
| Ability to identify and define the level of risk associated with an operation. |
| Ability to identify and define the level of acceptable risk associated with an operation, such as an exploration of ocean depths. |
| Ability to consider a collective set of risk factors about an operation and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an operation or its component parts. |
| Ability to determine access rights limitations for an operation. |
| Ability to understand the access rights limitations for an operation. |
| Ability to impose access rights limitations for an operation. |
| Ability to associate an operation with other business objects. |
| Ability to associate an operation with a brand. |
| Ability to associate an operation with a public sector entity. |
| Ability to associate an operation with an infrastructure. |
| Ability to associate an operation with an investment portfolio. |
| Ability to associate an operation with a location. |
| Ability to associate an operation with a market. |
| Ability to associate an operation with a network. |
| Ability to associate an operation with a policy. |
| Ability to associate an operation with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an operation. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an operation and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an operation. |

Copyright Business Architecture Guild 2025

| |
|---|
| Ability to determine, modify, and interpret the status or condition of an operation. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an operation. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an operation. |
| Ability to leverage various calculations to derive analytics for an operation. |
| Ability to evaluate and ascertain commonalities across a set of analytical information for an operation. |
| Ability to define, place, split, validate, and cancel an instruction, by one party to another, to buy, sell, exchange, provide, or deliver goods or services. |
| Ability to establish and identify an order. |
| Ability to declare an order. |
| Ability to recognize an order. |
| Ability to articulate a proposed or estimated worth of an order. |
| Ability to set, issue, or enter an order for goods or services. |
| Ability to complete and finalize an order that has been wholly or partially fulfilled. |
| Ability to ensure that an order satisfies a minimum level of requirements. |
| Ability to permanently stop an order. |
| Ability to temporarily hold or halt an order. |
| Ability to decompose an order of multiple goods or services into a set of sub-orders for individual, or smaller set of, goods or services. |
| Ability to combine orders of goods or services into a superset of orders for goods or services. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an order. |
| Ability to identify and define the level of risk associated with an order. |
| Ability to identify and define the level of acceptable risk associated with an order. |
| Ability to consider a collective set of risk factors about an order and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an order or its component parts. |
| Ability to determine access rights limitations for an order. |
| Ability to understand the access rights limitations for an order. |
| Ability to impose access rights limitations for an order. |
| Ability to associate an order with other business objects. |
| Ability to associate an order with an agreement. |

| |
|---|
| Ability to associate an order with an asset. |
| Ability to associate an order with a channel. |
| Ability to associate an order with a constituent. |
| Ability to associate an order with a financial instrument. |
| Ability to associate an order with an infrastructure. |
| Ability to associate an order with a license. |
| Ability to associate an order with a human resource. |
| Ability to associate an order with an order. |
| Ability to associate an order with a partner. |
| Ability to associate an order with a payment. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an order. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an order and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an order. |
| Ability to determine, modify, and interpret the status or condition of an order. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an order. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an order. |
| Ability to define, validate, and valuate an order element that refers to a specific good or service. |
| Ability to establish and identify an order item. |
| Ability to declare an order item. |
| Ability to recognize an order item. |
| Ability to ensure that an order item satisfies a minimum level of requirements. |
| Ability to articulate a proposed or estimated worth of an order item. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an order item. |
| Ability to identify and define the level of risk associated with an order item. |
| Ability to identify and define the level of acceptable risk associated with an order item. |
| Ability to consider a collective set of risk factors about an order item and represent them from a rationalized perspective. |
| Ability to associate an order item with other business objects. |
| Ability to associate an order item with an asset. |

| |
|---|
| Ability to associate an order item with a government service. |
| Ability to associate an order item with a work item. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an order item. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an order item and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an order item. |
| Ability to determine, modify, and interpret the status or condition of an order item. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an order item. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an order item. |
| Ability to identify, engage, collaborate with, control, predict, process, organize, present, and analyze all information, documents, preferences, experiences, and history related to a legal entity that has, plans to have, or has had some degree of involvement with the organization. |
| Ability to establish and identify a partner. |
| Ability to declare a partner. |
| Ability to recognize a partner. |
| Ability to identify and engage with existing or potential new partners for purposes of delivering specific services or assets to the organization or its constituents. |
| Ability to determine how well a partner is meeting specification and objective levels, or delivering against plan. |
| Ability to determine, establish, and maintain specific preferences of a partner. |
| Ability to understand, clarify, or describe a partner preference in relation to how that partner would like to interact with the organization. |
| Ability to apply, impose, or administer a partner's chosen preferences with the organization. |
| Ability to articulate and evaluate a collective set of agreements associated with a partner with the intention of determining the value of, modifying, or optimizing the balance of that collective set of partner-owned agreements. |
| Ability to determine if the collective set of partner relationships is meeting the threshold of expressed desire and expectations. |
| Ability to evaluate the performance of the collective set of partner relationships as input to possible optimization of that portfolio. |
| Ability to determine how well a partner is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a partner. |
| Ability to determine if a partner is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a partner to underperform. |

| |
|---|
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a partner. |
| Ability to identify and define the level of risk associated with a partner. |
| Ability to identify and define the level of acceptable risk associated with a partner. |
| Ability to consider a collective set of risk factors about a partner and represent them from a rationalized perspective. |
| Ability to associate a partner with other business objects. |
| Ability to associate a partner with a channel. |
| Ability to associate a partner with a competency. |
| Ability to associate a partner with energy. |
| Ability to associate a partner with a financial forecast. |
| Ability to associate a partner with a financial position. |
| Ability to associate a partner with a geographic space. |
| Ability to associate a partner with a government service. |
| Ability to associate a partner with an investment portfolio. |
| Ability to associate a partner with a language. |
| Ability to associate a partner with a location. |
| Ability to associate a partner with a market. |
| Ability to associate a partner with a natural resource. |
| Ability to associate a partner with a partner. |
| Ability to associate a partner with a policy. |
| Ability to associate a partner with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a partner. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a partner and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a partner. |
| Ability to determine, modify, and interpret the status or condition of a partner. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a partner. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a partner. |
| Ability to determine that a partner is who they claim to be based on a defined confidence level. |
| Ability to declare that a partner is who they claim to be. |

Copyright Business Architecture Guild 2025

| |
|---|
| Ability to ascertain the degree to which a partner is authenticated. |
| Ability to define the degree of confidence needed to authenticate a partner for various scenarios. |
| Ability to define, determine, and assign partner access features, attributes, and characteristics. |
| Ability to ascribe authorization to a partner. |
| Ability to describe the nature of partner authorization classifications, for example, authorization levels, ratings, or groups. |
| Ability to ascertain authorization of a partner. |
| Ability to research, define, award, and establish a way or course taken in getting from a starting point to a destination, which may include stops along the way. |
| Ability to establish and identify a route. |
| Ability to declare a route. |
| Ability to recognize a route. |
| Ability to determine how well a route is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a route. |
| Ability to determine if a route is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a route to underperform. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a route. |
| Ability to identify and define the level of risk associated with a route. |
| Ability to identify and define the level of acceptable risk associated with a route. |
| Ability to consider a collective set of risk factors about a route and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a route or its component parts. |
| Ability to determine access rights limitations for a route. |
| Ability to understand the access rights limitations for a route. |
| Ability to impose access rights limitations for a route. |
| Ability to associate a route with other business objects. |
| Ability to associate a route with an asset. |
| Ability to associate a route with a campaign. |
| Ability to associate a route with a partner. |
| Ability to associate a route with a plan. |
| Ability to associate a route with a strategy. |

| |
|---|
| Ability to associate a route with a location. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a route. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a route and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a route. |
| Ability to determine, modify, and interpret the status or condition of a route. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a route. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a route. |
| Ability to maintain a convention, specification, or measurement, confirmed by a recognized governance body. |
| Ability to establish and identify a standard. |
| Ability to declare a standard. |
| Ability to recognize a standard. |
| Ability to understand and be able to explain the meaning and impacts of a standard and its applicability to a defined object. |
| Ability to establish thresholds for and determine whether a defined object meets with the specification of or aligns with a standard. |
| Ability to set acceptable and unacceptable levels of conformance associated with a standard. |
| Ability to determine the variance between exceeding or falling short of acceptable levels of conformance associated with a standard. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a standard. |
| Ability to identify and define the level of risk associated with a standard. |
| Ability to identify and define the level of acceptable risk associated with a standard. |
| Ability to consider a collective set of risk factors about a standard and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a standard or its component parts. |
| Ability to determine access rights limitations for a standard. |
| Ability to understand the access rights limitations for a standard. |
| Ability to impose access rights limitations for a standard. |
| Ability to develop the idea for a standard using predetermined specifications or success criteria in order to define the standard's features. |
| Ability to draft and otherwise construct a standard from its initial state through modifications and finalization. |
| Ability to ensure that a standard has been examined, tested, and otherwise determined to be fit for its intended use. |
| Ability to define and maintain categories of standard that facilitate a common understanding of the attributes and impact of the standard. |

| |
|---|
| Ability to define and maintain classifications, identification, and nomenclature of a standard to facilitate common understanding and practice. |
| Ability to set the range of activities and concerns addressed by a standard and the ability to constrain the standard to apply or operate within that boundary. |
| Ability to define, track, and articulate the stages of a standard, from the time it was defined until it is not fit for its intended use. |
| Ability to organize, aggregate, segment, and prioritize a collection of standards. |
| Ability to assess and quantify the degree of familiarity and recognition a standard has within and across various domains. |
| Ability to associate a standard with other business objects. |
| Ability to associate a standard with an accreditation. |
| Ability to associate a standard with an agreement. |
| Ability to associate a standard with an agreement term. |
| Ability to associate a standard with a biological organism. |
| Ability to associate a standard with a brand. |
| Ability to associate a standard with a campaign. |
| Ability to associate a standard with a claim. |
| Ability to associate a standard with a competency. |
| Ability to associate a standard with a constituent. |
| Ability to associate a standard with content. |
| Ability to associate a standard with a conveyor. |
| Ability to associate a standard with energy. |
| Ability to associate a standard with evidence. |
| Ability to associate a standard with a financial account. |
| Ability to associate a standard with a financial instrument. |
| Ability to associate a standard with a financial transaction. |
| Ability to associate a standard with a geographic space. |
| Ability to associate a standard with a government service. |
| Ability to associate a standard with a health condition. |
| Ability to associate a standard with an investment portfolio. |
| Ability to associate a standard with a job. |

| |
|---|
| Ability to associate a standard with a language. |
| Ability to associate a standard with legislation. |
| Ability to associate a standard with a license. |
| Ability to associate a standard with a location. |
| Ability to associate a standard with a natural resource. |
| Ability to associate a standard with an operation. |
| Ability to associate a standard with an order. |
| Ability to associate a standard with a partner. |
| Ability to associate a standard with a payment. |
| Ability to associate a standard with a policy. |
| Ability to associate a standard with research. |
| Ability to associate a standard with a route. |
| Ability to associate a standard with a standard. |
| Ability to associate a standard with a tax. |
| Ability to associate a standard with a time. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a standard. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a standard and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a standard. |
| Ability to determine, modify, and interpret the status or condition of a standard. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a standard. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a standard. |
| Ability to define, conceptualize, create, and convey structured theoretical or practical subject matter in a consumable format, associated with a curriculum, workshop, or seminar. |
| Ability to establish and identify a training course. |
| Ability to declare a training course. |
| Ability to recognize a training course. |
| Ability to structure a training course aligned with its corresponding objectives. |
| Ability to create, modify, and customize related training course and materials. |

| |
|---|
| Ability to frame the core and contextual elements, learning dependencies, and other factors to be addressed in the creation of the training course. |
| Ability to identify the individual topics, skills, and concepts that, taken as a whole, constitute a body of a training course. |
| Ability to weigh the advantages and disadvantages of developing the content in-house or obtaining the training course from an external source. |
| Ability to deliver a training course utilizing a variety of methods, including but not limited to, real-time, on-demand, human or automated, individual or group study. |
| Ability to determine how well a training course is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a training course. |
| Ability to determine if a training course is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a training course to underperform. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a training course. |
| Ability to identify and define the level of risk associated with a training course. |
| Ability to identify and define the level of acceptable risk associated with a training course. |
| Ability to consider a collective set of risk factors about a training course and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a training course or its component parts. |
| Ability to determine access rights limitations for a training course. |
| Ability to understand the access rights limitations for a training course. |
| Ability to impose access rights limitations for a training course. |
| Ability to assess how well a component or curriculum of a training course meets defined learning objectives and other design criteria. |
| Ability to develop, assess, and continually update the listing of a training course made available to teaching organizations. |
| Ability to define the target audiences for the training course catalog. |
| Ability to publish and propagate the catalog content. |
| Ability to collect, assess, and disseminate findings from the results of exams and learning context data about a learning environment of the students prior to and during the exams. |
| Ability to identify and analyze the results from exams designed to assess student acquisition of information against a defined set of objectives. |

| |
|---|
| Ability to reflect the trajectory of efficacy of the design of the training course, the delivery methods, and the learning and testing environments. |
| Ability to associate a training course with other business objects. |
| Ability to associate a training course with a constituent. |
| Ability to associate a training course with content. |
| Ability to associate a training course with a government service. |
| Ability to associate a training course with a human resource. |
| Ability to associate a training course with an initiative. |
| Ability to associate a training course with a job. |
| Ability to associate a training course with a language. |
| Ability to associate a training course with a location. |
| Ability to associate a training course with an objective. |
| Ability to associate a training course with a partner. |
| Ability to associate a training course with a plan. |
| Ability to associate a training course with a policy. |
| Ability to associate a training course with a standard. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a training course. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a training course and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a training course. |
| Ability to determine, modify, and interpret the status or condition of a training course. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a training course. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a training course. |
| Ability to leverage various calculations to derive analytics for a training course. |
| Ability to evaluate and ascertain commonalities across a set of analytical information for a training course. |
| Ability to plan, track, prepare for, depart, arrive, and adjust a journey between a starting point location and one or more targeted locations until a final destination is reached. |
| Ability to establish and identify a trip. |

| |
|---|
| Ability to declare a trip. |
| Ability to recognize a trip. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a trip. |
| Ability to identify and define the level of risk associated with a trip. |
| Ability to identify and define the level of acceptable risk associated with a trip. |
| Ability to consider a collective set of risk factors about a trip and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a trip or its component parts. |
| Ability to determine access rights limitations for a trip. |
| Ability to understand the access rights limitations for a trip. |
| Ability to impose access rights limitations for a trip. |
| Ability to associate a trip with other business objects. |
| Ability to associate a trip with an asset. |
| Ability to associate a trip with a campaign. |
| Ability to associate a trip with a constituent. |
| Ability to associate a trip with a location. |
| Ability to associate a trip with a plan. |
| Ability to associate a trip with a route. |
| Ability to associate a trip with a partner. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a trip. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a trip and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a trip. |
| Ability to determine, modify, and interpret the status or condition of a trip. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a trip. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a trip. |
| Ability to establish, organize, analyze, administer, and report on all aspects of a formal indication of choice such as for a candidate election, referendum, or proposition. |
| Ability to establish and identify a vote. |
| Ability to declare a vote. |

| |
|---|
| Ability to recognize a vote. |
| Ability to identify, assess, track, and report on the various stages of vote evolution. |
| Ability to decipher, trace, record, and present a chronology that depicts the sequence of custody, control, transfer, analysis, and disposition of physical or electronic vote. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a vote. |
| Ability to identify and define the level of risk associated with a vote. |
| Ability to identify and define the level of acceptable risk associated with a vote. |
| Ability to consider a collective set of risk factors about a vote and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a vote or its component parts. |
| Ability to determine access rights limitations for a vote. |
| Ability to understand the access rights limitations for a vote. |
| Ability to impose access rights limitations for a vote. |
| Ability to associate a vote with other business objects. |
| Ability to associate a vote with a constituent. |
| Ability to associate a vote with a decision. |
| Ability to associate a vote with a job. |
| Ability to associate a vote with legislation. |
| Ability to associate a vote with a location. |
| Ability to associate a vote with an interaction. |
| Ability to associate a vote with a message. |
| Ability to associate a vote with an operation. |
| Ability to associate a vote with a policy. |
| Ability to associate a vote with a standard. |
| Ability to associate a vote with a time. |
| Ability to associate a vote with a vote. |
| Ability to associate a vote with a campaign. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a vote. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a vote and its relationships. |

| |
|---|
| Ability to determine, modify, and interpret the category or classification of a vote. |
| Ability to determine, modify, and interpret the status or condition of a vote. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a vote. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a vote. |
| Ability to create, track, report on, and dispose of tangible or intangible property. |
| Ability to establish and identify an asset. |
| Ability to declare an asset. |
| Ability to recognize an asset. |
| Ability to assess an asset to assign a monetary value to it. |
| Ability to determine if an asset is the proper and correct asset, as compared to a set of internal requirements. |
| Ability to set up and prepare an asset for use. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an asset. |
| Ability to identify and define the level of risk associated with an asset. |
| Ability to identify and define the level of acceptable risk associated with an asset. |
| Ability to consider a collective set of risk factors about an asset and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an asset or its component parts. |
| Ability to determine access rights limitations for an asset. |
| Ability to understand the access rights limitations for an asset. |
| Ability to impose access rights limitations for an asset. |
| Ability to determine how well an asset is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for an asset. |
| Ability to determine if an asset is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing an asset to underperform. |
| Ability to define, track, and articulate the series of stages of an asset, between the time it was acquired or created until it is destroyed or disposed. |
| Ability to bring an asset into use. |
| Ability to remove an asset from active use. |
| Ability to count, track, organize, and register assets. |
| Ability to associate an asset with other business objects. |

| |
|---|
| Ability to associate an asset with an asset. |
| Ability to associate an asset with a competency. |
| Ability to associate an asset with a constituent. |
| Ability to associate an asset with a financial forecast. |
| Ability to associate an asset with a financial position. |
| Ability to associate an asset with a human resource. |
| Ability to associate an asset with an initiative. |
| Ability to associate an asset with an infrastructure. |
| Ability to associate an asset with an investment portfolio. |
| Ability to associate an asset with a job. |
| Ability to associate an asset with a location. |
| Ability to associate an asset with a partner. |
| Ability to associate an asset with a policy. |
| Ability to associate an asset with a public sector entity. |
| Ability to associate an asset with a work item. |
| Ability to associate an asset with an accreditation. |
| Ability to associate an asset with a biological organism. |
| Ability to associate an asset with a case. |
| Ability to associate an asset with a dispute. |
| Ability to associate an asset with evidence. |
| Ability to associate an asset with a health condition. |
| Ability to associate an asset with legislation. |
| Ability to associate an asset with a license. |
| Ability to associate an asset with a standard. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an asset. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an asset and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an asset. |
| Ability to determine, modify, and interpret the status or condition of an asset. |

| |
|---|
| Ability to identify, record, and represent a chronological order of events and actions associated with an asset. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an asset. |
| Ability to determine that an asset is that which it claims to be based on a defined confidence level. |
| Ability to declare that an asset is that which it claims to be. |
| Ability to ascertain the degree to which an asset is authenticated. |
| Ability to define the degree of confidence needed to authenticate an asset for various scenarios. |
| Ability to define, determine, and assign asset access features, attributes, and characteristics. |
| Ability to ascribe authorization to an asset. |
| Ability to describe the nature of asset authorization classifications, for example, authorization levels, ratings, or groups. |
| Ability to ascertain authorization of an asset. |
| Ability to assess and determine possible negative consequences associated with sources of harm or danger from contact with or use or disposal of a device. |
| Ability to determine the exposure to danger or hazard an asset presents. |
| Ability to determine the danger or hazard that an asset may be exposed to that may result in degraded function or complete failure. |
| Ability to identify and define the prospect or probability that a threat will occur as a result of the existence or use of the asset. |
| Ability to identify and define the effect or consequence of a threat associated with the existence or use of the asset. |
| Ability to identify, assess, classify, prioritize, remediate, and mitigate an exposure to harm or danger. |
| Ability to define, design, profile, rate, and validate the skills and knowledge necessary to do something. |
| Ability to establish and identify a competency. |
| Ability to declare a competency. |
| Ability to recognize a competency. |
| Ability to articulate different skills and knowledge scale required for a competency. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a competency. |
| Ability to identify and define the level of risk associated with a competency. |
| Ability to identify and define the level of acceptable risk associated with a competency. |
| Ability to consider a collective set of risk factors about a competency and represent them from a rationalized perspective. |
| Ability to associate a competency with other business objects. |
| Ability to associate a competency with a competency. |
| Ability to associate a competency with content. |

| |
|---|
| Ability to associate a competency with a language. |
| Ability to associate a competency with a plan. |
| Ability to associate a competency with a policy. |
| Ability to associate a competency with a training course. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a competency. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a competency and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a competency. |
| Ability to determine, modify, and interpret the status or condition of a competency. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a competency. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a competency. |
| Ability to plan, develop, create, capture, modify, evaluate, catalog, archive, and publish a creative work or other authored item, such as is manifested in audio/visual, still image, textual, experiential, mixed-media, or other forms. |
| Ability to establish and identify content. |
| Ability to declare content. |
| Ability to recognize content. |
| Ability to ideate, express, and capture a piece of content into existence. |
| Ability to imagine or conceive of content. |
| Ability to bring content into being through physical, mental, or other means. |
| Ability to record a piece of expressed content. |
| Ability to formulate captured content that includes sequencing, formatting, and otherwise editing the content to prepare it for consumption or use. |
| Ability to place subcomponents of content into a determined order, generally in an effort to make more consumable. |
| Ability to prepare content for consumption by correcting, condensing, and otherwise modifying that content. |
| Ability to arrange or set out content to prepare it for formal consumption. |
| Ability to change content from one manifestation to another. |
| Ability to render content so that it can be perceived. |
| Ability to store, protect, and retrieve content in a way that makes it selectively accessible for future use. |
| Ability to define, interpret, and enforce the right to view, use, or modify content or its component parts. |

| |
|---|
| Ability to determine access rights limitations for content. |
| Ability to understand the access rights limitations for content. |
| Ability to impose access rights limitations for content. |
| Ability to determine if content is proper and correct, as compared to a set of predefined policies or business requirements. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with content. |
| Ability to identify and define the level of risk associated with content. |
| Ability to identify and define the level of acceptable risk associated with content. |
| Ability to consider a collective set of risk factors about content and represent them from a rationalized perspective. |
| Ability to capture, measure, forecast, aggregate, and otherwise analyze an instance of content consumption. |
| Ability to establish and identify a content impression. |
| Ability to declare a content impression. |
| Ability to recognize a content impression. |
| Ability to estimate the future number of impressions, to be determined at a future point in time. |
| Ability to count, quantify, and otherwise tally the number of actual impressions associated with content. |
| Ability to assess and categorize content impressions into a recognizable and repeatable form that can be used to determine future impression activity. |
| Ability to determine, modify, and interpret the category or classification of a content impression. |
| Ability to determine, modify, and interpret the status or condition of a content impression. |
| Ability to identify and maintain variations of content. |
| Ability to manage and articulate the differences among various versions of the same content. |
| Ability to ensure the smooth transition from one version of content to another, including scenarios where this is not possible. |
| Ability to organize and present content in a way that provides a readily determinable means of discerning what content is available to various stakeholders. |
| Ability to associate content with other business objects. |
| Ability to associate content with an asset. |
| Ability to associate content with a channel. |
| Ability to associate content with content. |
| Ability to associate content with a constituent. |
| Ability to associate content with a government service. |

| |
|---|
| Ability to associate content with legislation. |
| Ability to associate content with a location. |
| Ability to associate content with a market. |
| Ability to associate content with a message. |
| Ability to associate content with a partner. |
| Ability to associate content with a plan. |
| Ability to associate content with a policy. |
| Ability to associate content with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about content. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about content and its relationships. |
| Ability to determine, modify, and interpret the category or classification of content. |
| Ability to determine, modify, and interpret the status or condition of content. |
| Ability to identify, record, and represent a chronological order of events and actions associated with content. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of content. |
| Ability to plan, direct, monitor, organize, control, and report on the monetary aspects and resources that the organization is responsible for. |
| Ability to determine, define, or monitor financial threats and vulnerabilities related to the financial condition of the organization. |
| Ability to assess and determine financial exposures associated with outside incursions or possible sources of danger. |
| Ability to assess and determine financial exposures associated with internal weaknesses or susceptibilities. |
| Ability to consider and incorporate multiple risk factors to establish a consolidated perspective on financial risk. |
| Ability to define, develop, and control a financial estimate, prediction, or projection, based on, but not limited to, history and market trends. |
| Ability to establish and identify a financial forecast. |
| Ability to declare a financial forecast. |
| Ability to recognize a financial forecast. |
| Ability to express and articulate a financial forecast. |
| Ability to verify a financial forecast. |
| Ability to understand a financial forecast. |

| Ability to impose access rights limitations for a tax. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a tax. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a tax and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a tax. |
| Ability to determine, modify, and interpret the status or condition of a tax. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a tax. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a tax. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a tax. |
| Ability to identify and define the level of risk associated with a tax. |
| Ability to identify and define the level of acceptable risk associated with a tax. |
| Ability to consider a collective set of risk factors about a tax and represent them from a rationalized perspective. |

| |
|---|
| Ability to determine, approve, commit, execute, record, or report on an obligation to remit or receive a monetary amount between an organization and a customer, partner, or other external party. |
| Ability to establish and identify a payment. |
| Ability to declare a payment. |
| Ability to recognize a payment. |
| Ability to calculate and recognize a specific value associated with a payment. |
| Ability to define, interpret, and enforce the right to view, use, or modify a payment or its component parts. |
| Ability to determine access rights limitations for a payment. |
| Ability to understand the access rights limitations for a payment. |
| Ability to impose access rights limitations for a payment. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a payment. |
| Ability to identify and define the level of risk associated with a payment. |
| Ability to identify and define the level of acceptable risk associated with a payment. |
| Ability to consider a collective set of risk factors about a payment and represent them from a rationalized perspective. |
| Ability to associate a payment with other business objects. |
| Ability to associate a payment with a channel. |
| Ability to associate a payment with a license. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a payment. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a payment and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a payment. |
| Ability to determine, modify, and interpret the status or condition of a payment. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a payment. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a payment. |
| Ability to authorize, handle, record, and apply an instance of a monetary amount movement or related exchange across organizations, agreements, or financial accounts. |
| Ability to establish and identify a financial transaction. |
| Ability to declare a financial transaction. |
| Ability to recognize a financial transaction. |

| |
|---|
| Ability to record and maintain both the monetary and non-monetary details associated with a financial transaction that assures its overall integrity. |
| Ability to define, interpret, and enforce the right to view, use, or modify a financial transaction or its component parts. |
| Ability to determine access rights limitations for a financial transaction. |
| Ability to understand the access rights limitations for a financial transaction. |
| Ability to impose access rights limitations for a financial transaction. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a financial transaction. |
| Ability to identify and define the level of risk associated with a financial transaction. |
| Ability to identify and define the level of acceptable risk associated with a financial transaction. |
| Ability to consider a collective set of risk factors about a financial transaction and represent them from a rationalized perspective. |
| Ability to associate a financial transaction with other business objects. |
| Ability to associate a financial transaction with an asset. |
| Ability to associate a financial transaction with a channel. |
| Ability to associate a financial transaction with a constituent. |
| Ability to associate a financial transaction with a currency. |
| Ability to associate a financial transaction with a human resource. |
| Ability to associate a financial transaction with a financial account. |
| Ability to associate a financial transaction with an investment portfolio. |
| Ability to associate a financial transaction with an order. |
| Ability to associate a financial transaction with a partner. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a financial transaction. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a financial transaction and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a financial transaction. |
| Ability to determine, modify, and interpret the status or condition of a financial transaction. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a financial transaction. |

| |
|---|
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a financial transaction. |
| Ability to establish, determine, identify, and maintain a representation of value as expressed in a currency. |
| Ability to establish and identify a monetary amount. |
| Ability to declare a monetary amount. |
| Ability to recognize a monetary amount. |
| Ability to associate a monetary amount with other business objects. |
| Ability to associate a monetary amount with a currency. |
| Ability to associate a monetary amount with a financial account. |
| Ability to associate a monetary amount with a financial transaction. |
| Ability to associate a monetary amount with a payment. |
| Ability to associate a monetary amount with a tax. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a monetary amount. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a monetary amount and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a monetary amount. |
| Ability to determine, modify, and interpret the status or condition of a monetary amount. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a monetary amount. |
| Ability to organize, monitor, report on, and otherwise disseminate basic attributes, data, and other perspectives about the financials of the organization. |
| Ability to identify, track, validate, report on, and otherwise administer descriptive information related to an organization's finances. |
| Ability to determine, modify, and interpret the category or classification of finance. |
| Ability to determine, modify, and interpret the status or condition of finance. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an organization's finances. |
| Ability to discover, interpret, and communicate meaningful patterns, metrics, measures, and thresholds from finance information. |
| Ability to assess, mentor, compensate, terminate, and otherwise coordinate an individual who has, plans to have, or has had a legal agreement with the organization, which may include compensation and other benefits on a temporary or permanent basis. |

| |
|---|
| Ability to establish and identify a human resource. |
| Ability to declare a human resource. |
| Ability to recognize a human resource. |
| Ability to determine how well a human resource is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a human resource. |
| Ability to determine if a human resource is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a human resource to underperform. |
| Ability to capture, represent, analyze, and act upon explicit or implicit inclinations, leanings, likings, predispositions, penchants, or options, expressed formally or informally, as determined or derived from a combination of sources and associated with a human resource. |
| Ability to characterize the preferences that are related to a human resource. |
| Ability to understand the differences in preference patterns of a human resource. |
| Ability to put into effect a plan or course of action to act upon the preferences associated with a human resource. |
| Ability to determine the monetary and non-monetary value to be exchanged for the work done and role played by a human resource. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a human resource. |
| Ability to identify and define the level of risk associated with a human resource. |
| Ability to identify and define the level of acceptable risk associated with a human resource. |
| Ability to consider a collective set of risk factors about a human resource and represent them from a rationalized perspective. |
| Ability to associate a human resource with other business objects. |
| Ability to associate a human resource with an operation. |
| Ability to associate a human resource with a campaign. |
| Ability to associate a human resource with a claim. |
| Ability to associate a human resource with a competency. |
| Ability to associate a human resource with an infrastructure. |
| Ability to associate a human resource with a human resource. |
| Ability to associate a human resource with a job. |
| Ability to associate a human resource with a language. |
| Ability to associate a human resource with legislation. |

|---|
| Ability to associate a human resource with a location. |
| Ability to associate a human resource with a partner. |
| Ability to associate a human resource with a payment. |
| Ability to associate a human resource with a plan. |
| Ability to associate a human resource with a policy. |
| Ability to associate a human resource with a public sector entity. |
| Ability to associate a human resource with research. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a human resource. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a human resource and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a human resource. |
| Ability to determine, modify, and interpret the status or condition of a human resource. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a human resource. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a human resource. |
| Ability to leverage various calculations to derive analytics for human resources within the organization. |
| Ability to evaluate and ascertain commonalities across a set of analytical information for human resources. |
| Ability to determine that a human resource is who they claim to be based on a defined confidence level. |
| Ability to declare that a human resource is who they claim to be. |
| Ability to ascertain the degree to which a human resource is authenticated. |
| Ability to define the degree of confidence needed to authenticate a human resource for various scenarios. |
| Ability to define, determine, and assign human resource access features, attributes, and characteristics. |
| Ability to ascribe authorization to a human resource. |
| Ability to describe the nature of human resource authorization classifications, for example, authorization levels, ratings, or groups. |
| Ability to ascertain authorization of a human resource. |
| Ability to define, organize, structure, secure, protect, and disseminate facts, statistics, attributes, and other types of data about an organization's set of business objects. |
| Ability to establish and identify information. |
| Ability to declare information. |

| |
|---|
| Ability to recognize information. |
| Ability to classify, categorize, index, annotate, model, and otherwise structure information for purposes of searching, retrieving, and reusing it. |
| Ability to gather and express information in a summary form to satisfy an organization need. |
| Ability to selectively prepare and expose information so that it is fit for purpose. |
| Ability to remove redundancy in, tokenize, and otherwise reduce the size, footprint, usage, and volume of information. |
| Ability to render information in digital form and to distribute access to it across one or more digital sources. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations for all information across the organization's ecosystem. |
| Ability to define, assign, and track variants on information over time and location. |
| Ability to ensure that information has been examined, tested, and otherwise determined to be fit for its intended use according to a defined set of policies. |
| Ability to ensure that information is correct, accurate, and meaningful. |
| Ability to control access, use, disclosure, disruption, modification, inspection, recording, or destruction of information. |
| Ability to encode information in a cipher to prevent or limit its unauthorized access, change, or claim of provenance. |
| Ability to conceal information content in a cipher using symmetric or public key encryption. |
| Ability to ensure that information is from a known, determinate source using symmetric or public key encryption. |
| Ability to determine the degree of authority required to create, access, modify, and delete information. |
| Ability to establish authorization levels for particular information for types of persons or organizations. |
| Ability to interpret the degree of authority associated with a point of access and allow or withdraw access based on the association between the degree of authority required and that of the accessor. |
| Ability to store and control information so that it may be found and retrieved as required. |
| Ability to establish a timeline for information retention. |
| Ability to determine requirements for backup, save information for a predetermined amount of time, and to retrieve that information on demand. |
| Ability to alter, convert, renovate, and otherwise change information in accordance with a given plan or pattern. |
| Ability to track, control, and interpret the status of information from a multitude of known dimensions and conditions. |
| Ability to manage the categories and taxonomies of information. |
| Ability to identify, record, and represent a chronological order of events and actions associated with information over time. |

| |
|---|
| Ability to associate information with other business objects. |
| Ability to associate information with a plan. |
| Ability to associate information with a policy. |
| Ability to associate information with a strategy. |
| Ability to define, interpret, and enforce the right to view, use, or modify information or its component parts. |
| Ability to understand the access rights limitations for information. |
| Ability to define, discover, interpret, and classify a question, request, feedback, or comment that may exist inside or outside of the organization. |
| Ability to establish and identify an inquiry. |
| Ability to declare an inquiry. |
| Ability to recognize an inquiry. |
| Ability to find and incorporate an inquiry from a specified audience. |
| Ability to determine the meaning and intent of an inquiry. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an inquiry. |
| Ability to identify and define the level of risk associated with an inquiry. |
| Ability to identify and define the level of acceptable risk associated with an inquiry. |
| Ability to consider a collective set of risk factors about an inquiry and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an inquiry or its component parts. |
| Ability to determine access rights limitations for an inquiry. |
| Ability to understand the access rights limitations for an inquiry. |
| Ability to impose access rights limitations for an inquiry. |
| Ability to associate an inquiry with other business objects. |
| Ability to associate an inquiry with an agreement. |
| Ability to associate an inquiry with an asset. |
| Ability to associate an inquiry with a brand. |
| Ability to associate an inquiry with a channel. |
| Ability to associate an inquiry with content. |
| Ability to associate an inquiry with a constituent. |

| |

| Ability to associate an inquiry with a policy. |
| Ability to associate an inquiry with research. |
| Ability to associate an inquiry with a strategy. |
| Ability to associate an inquiry with a training course. |
| Ability to associate an inquiry with a work item. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an inquiry. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an inquiry and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an inquiry. |
| Ability to determine, modify, and interpret the status or condition of an inquiry. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an inquiry. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an inquiry. |
| Ability to identify, define, assign, and manage a named category of accountabilities, whether remunerative or non-remunerative, associated with an assigned, specific, and accountable organization duty, role, or function that can be executed by a human or non-human resource. |
| Ability to establish and identify a job. |
| Ability to declare a job. |

| |
|---|
| Ability to recognize a job. |
| Ability to identify, define, and configure the attributes for accountabilities specific to a job. |
| Ability to establish a compensation range and compensation criteria for a job. |
| Ability to put into effect or out of effect the accountabilities designed specific to a job. |
| Ability to assess the job against the need for which it was created. |
| Ability to determine how well a job is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a job. |
| Ability to determine if a job is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a job to underperform. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a job. |
| Ability to identify and define the level of risk associated with a job. |
| Ability to identify and define the level of acceptable risk associated with a job. |
| Ability to consider a collective set of risk factors about a job and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a job or its component parts. |
| Ability to determine access rights limitations for a job. |
| Ability to understand the access rights limitations for a job. |
| Ability to impose access rights limitations for a job. |
| Ability to associate a job with other business objects. |
| Ability to associate a job with an agreement. |
| Ability to associate a job with content. |
| Ability to associate a job with a competency. |
| Ability to associate a job with a constituent. |
| Ability to associate a job with a job. |
| Ability to associate a job with a location. |
| Ability to associate a job with a plan. |
| Ability to associate a job with a policy. |
| Ability to associate a job with a strategy. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a job. |

| |
|---|
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a job and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a job. |
| Ability to determine, modify, and interpret the status or condition of a job. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a job. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a job. |
| Ability to define, express, recognize, interpret, and translate a method of communication or dialect variant consisting of units of representation or meaning, such as numbers, words, symbols, sounds, or other physical manifestations and gestures, presented in a structured way. |
| Ability to establish and identify a language. |
| Ability to declare a language. |
| Ability to recognize a language. |
| Ability to understand a language. |
| Ability to articulate in a language. |
| Ability to transform one language to another and maintain the meaning and intent of the originating language. |
| Ability to associate a language with other business objects. |
| Ability to associate a language with content. |
| Ability to associate a language with a location. |
| Ability to associate a language with a language. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a language. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a language and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a language. |
| Ability to determine, modify, and interpret the status or condition of a language. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a language. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a language. |
| Ability to define, calculate, articulate, determine, disseminate, and otherwise track a position or site. |
| Ability to establish and identify a location. |
| Ability to declare a location. |

| |
|---|
| Ability to recognize a location. |
| Ability to identify a location by using its sub-categories and attributes. |
| Ability to define sub-categorizations of locations, for example, cities within countries. |
| Ability to change any representation of a location to another representation. |
| Ability to measure the qualitative or quantitative characteristics of a location. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a location. |
| Ability to identify and define the level of risk associated with a location. |
| Ability to identify and define the level of acceptable risk associated with a location. |
| Ability to consider a collective set of risk factors about a location and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify a location or its component parts. |
| Ability to determine access rights limitations for a location. |
| Ability to understand the access rights limitations for a location. |
| Ability to impose access rights limitations for a location. |
| Ability to associate a location with other business objects. |
| Ability to associate a location with a location. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a location. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a location and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a location. |
| Ability to determine, modify, and interpret the status or condition of a location. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a location. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a location. |
| Ability to define, design, track, activate, terminate and control access to a set of contemporaneous collaborations or contacts about a given subject, over a span of time, between two or more entities, using one or more channels, at one or more physical or virtual locations, such as meetings, interviews, seminars, or consultations. |
| Ability to commence or resume an interaction. |
| Ability to conceptualize, conceive, organize, structure, and formulate an interaction. |
| Ability to pause or conclude an interaction. |
| Ability to establish and identify an interaction. |

| |
|---|
| Ability to declare an interaction. |
| Ability to recognize an interaction. |
| Ability to determine how well an interaction is meeting specification and objective levels, or delivering against plan. |
| Ability to assess what is causing an interaction to underperform. |
| Ability to determine if an interaction is exceeding or falling short of an acceptable threshold of performance. |
| Ability to determine acceptable or unacceptable levels of performance for an interaction. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with an interaction. |
| Ability to identify and define the level of risk associated with an interaction. |
| Ability to identify and define the level of acceptable risk associated with an interaction. |
| Ability to consider a collective set of risk factors about an interaction and represent them from a rationalized perspective. |
| Ability to define, interpret, and enforce the right to view, use, or modify an interaction or its component parts. |
| Ability to determine access rights limitations for an interaction. |
| Ability to understand the access rights limitations for an interaction. |
| Ability to impose access rights limitations for an interaction. |
| Ability to associate an interaction with other business objects. |
| Ability to associate an interaction with an agreement. |
| Ability to associate an interaction with a channel. |
| Ability to associate an interaction with a dispute. |
| Ability to associate an interaction with evidence. |
| Ability to associate an interaction with a language. |
| Ability to associate an interaction with an objective. |
| Ability to associate an interaction with a policy. |
| Ability to associate an interaction with an asset. |
| Ability to associate an interaction with content. |
| Ability to associate an interaction with a constituent. |
| Ability to associate an interaction with a government service. |
| Ability to associate an interaction with a human resource. |
| Ability to associate an interaction with an infrastructure. |

| |
|---|
| Ability to associate an interaction with an initiative. |
| Ability to associate an interaction with legislation. |
| Ability to associate an interaction with a location. |
| Ability to associate an interaction with a market. |
| Ability to associate an interaction with an interaction. |
| Ability to associate an interaction with a partner. |
| Ability to associate an interaction with a plan. |
| Ability to associate an interaction with a public sector entity. |
| Ability to associate an interaction with a strategy. |
| Ability to associate an interaction with a training course. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about an interaction. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about an interaction and its relationships. |
| Ability to determine, modify, and interpret the category or classification of an interaction. |
| Ability to determine, modify, and interpret the status or condition of an interaction. |
| Ability to identify, record, and represent a chronological order of events and actions associated with an interaction. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of an interaction. |
| Ability to define, establish, articulate, and monitor a point or duration in the past, present, or future. |
| Ability to establish and identify a time. |
| Ability to declare a time. |
| Ability to recognize a time. |
| Ability to change any representation of a time to another representation. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a time. |
| Ability to identify and define the level of risk associated with a time. |
| Ability to identify and define the level of acceptable risk for a time. |
| Ability to consider a collective set of risk factors about a time and represent them from a rationalized perspective. |
| Ability to associate a time with other business objects. |
| Ability to associate a time with information. |

| |
|---|
| Ability to associate a time with a time. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a time. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a time and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a time. |
| Ability to determine, modify, and interpret the status or condition of a time. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a time. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a time. |
| Ability to capture, organize, prioritize, route, interpret, disseminate, assign, and administer tasks and task queues. |
| Ability to define, track, route, prioritize, determine the state of, fulfill, and assess the performance of a defined, well-bounded task that may be assigned to a stakeholder or corresponding asset. |
| Ability to establish and identify a work item. |
| Ability to declare a work item. |
| Ability to recognize a work item. |
| Ability to define the required needs and scope for establishing a work item. |
| Ability to order the sequence of work items by an item's importance in relation to another work item. |
| Ability to determine how well a work item is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a work item. |
| Ability to determine if a work item is exceeding or falling short of an acceptable threshold of performance. |
| Ability to assess what is causing a work item to underperform. |
| Ability to make work tasks available to individuals, teams, organization areas, or systems, typically in targeting work queues, based on a triggering event. |
| Ability to determine the location for the production of a work item. |
| Ability to define the production and delivery of work items across multiple locations. |
| Ability to allocate work against available resources in accordance with a schedule. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a work item. |
| Ability to identify and define the level of risk associated with a work item. |
| Ability to identify and define the level of acceptable risk associated with a work item. |
| Ability to consider a collective set of risk factors about a work item and represent them from a rationalized perspective. |

| |
|---|
| Ability to define, interpret, and enforce the right to view, use, or modify a work item or its component parts. |
| Ability to determine access rights limitations for a work item. |
| Ability to understand the access rights limitations for a work item. |
| Ability to impose access rights limitations for a work item. |
| Ability to associate a work item with other business objects. |
| Ability to associate a work item with a claim. |
| Ability to associate a work item with a channel. |
| Ability to associate a work item with a competency. |
| Ability to associate a work item with a constituent. |
| Ability to associate a work item with content. |
| Ability to associate a work item with a dispute. |
| Ability to associate a work item with an event. |
| Ability to associate a work item with a human resource. |
| Ability to associate a work item with an incident. |
| Ability to associate a work item with a job. |
| Ability to associate a work item with a license. |
| Ability to associate a work item with legislation. |
| Ability to associate a work item with an interaction. |
| Ability to associate a work item with a policy. |
| Ability to associate a work item with a work item. |
| Ability to associate a work item with a work queue. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a work item. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a work item and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a work item. |
| Ability to determine, modify, and interpret the status or condition of a work item. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a work item. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a work item. |
| Ability to define, prioritize, structure, control, and assign a container to hold, sequence, filter, structure, and present a set of work items. |

| |
|---|
| Ability to establish and identify a work queue. |
| Ability to declare a work queue. |
| Ability to recognize a work queue. |
| Ability to order the sequence of work queue by its importance in relation to another work queue. |
| Ability to view a subset of work items in a work queue based on one or more criteria. |
| Ability to arrange, configure, and design related work queues such as hierarchy, branching, and bundling. |
| Ability to associate a work queue with other business objects. |
| Ability to associate a work queue with an agreement. |
| Ability to associate a work queue with an asset. |
| Ability to associate a work queue with a human resource. |
| Ability to associate a work queue with an initiative. |
| Ability to associate a work queue with an order. |
| Ability to associate a work queue with a plan. |
| Ability to associate a work queue with a policy. |
| Ability to associate a work queue with a work queue. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a work queue. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a work queue and its relationships. |
| Ability to determine, modify, and interpret the category or classification of a work queue. |
| Ability to determine, modify, and interpret the status or condition of a work queue. |
| Ability to identify, record, and represent a chronological order of events and actions associated with a work queue. |
| Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a work queue. |
| Ability to define, interpret, and enforce the right to view, use, or modify a work queue or its component parts. |
| Ability to determine access rights limitations for a work queue. |
| Ability to understand the access rights limitations for a work queue. |
| Ability to impose access rights limitations for a work queue. |
| Ability to determine how well a work queue is meeting specification and objective levels, or delivering against plan. |
| Ability to determine acceptable or unacceptable levels of performance for a work queue. |
| Ability to determine if a work queue is exceeding or falling short of an acceptable threshold of performance. |

Copyright Business Architecture Guild 2025

| |
|---|
| Ability to assess what is causing a work queue to underperform. |
| Ability to identify, assess, aggregate, articulate, and incorporate various exposures to harm, danger, or loss associated with a work queue. |
| Ability to identify and define the level of risk associated with a work queue. |
| Ability to identify and define the level of acceptable risk associated with a work queue. |
| Ability to consider a collective set of risk factors about a work queue and represent them from a rationalized perspective. |
| Ability to define, develop, arrange, and administer an aggregation of schedule elements. |
| Ability to define, interpret, and enforce the right to view, use, or modify a schedule or its component parts. |
| Ability to determine access rights limitations for a schedule. |
| Ability to understand the access rights limitations for a schedule. |
| Ability to impose access rights limitations for a schedule. |
| Ability to establish and identify a schedule. |
| Ability to recognize a schedule. |
| Ability to declare a schedule. |
| Ability to define and develop a line item that aligns time and one or more other objects, including work item, human resource, payment, event, or location. |
| Ability to establish and identify a schedule element. |
| Ability to recognize a schedule element. |
| Ability to declare a schedule element. |
| Ability to collect, organize, monitor, report on, and otherwise disseminate basic facts, statistics, attributes, and data about a schedule element. |

Ability to identify, establish, validate, and articulate metrics and measures on historic and predictive determinations of a schedule element.

| |
|---|
| Ability to identify, record, and represent a chronological order of events and actions associated with a schedule element. |
| Ability to articulate, organize, identify, track, validate, and otherwise administer descriptive, identifying information about a schedule element and its relationships. |
| Ability to determine, modify, and interpret the status or condition of a schedule element. |
| Ability to determine, modify, and interpret the category or classification of a schedule element. |
| Ability to associate a schedule element with other business objects. |
| Ability to associate a schedule element with a location. |

| |

# Value Stream Inventory

| Value Stream Definition/Description |
| --- |
| The end-to-end perspective of acquiring an asset, from initiating and approving the asset request, to sourcing and processing procurement orders and delivering the asset to the requester. |
| The end-to-end perspective of obtaining coverage to indemnify against loss. |
| The end-to-end perspective of applying for, qualifying for, and receiving a new or renewal of a license or permit. |
| The end-to-end perspective of determining the degree to which the organization is adhering to established policies and regulations. |
| The end-to-end perspective of determining the degree to which the individual or organization is adhering to established policies and regulations, such as for financial, tax, or election violation probes. |
| The end-to-end perspective of setting scope, determining study means, designing the study, gathering research, producing findings, and delivering recommendations. |
| The end-to-end perspective of planning and executing the means, typically by ballot, to establish the constituents' choice for, or re-call of, a particular candidate(s), proposition, plebiscite, or referendum question. |
| The end-to-end perspective involved in the creation or update of policies that govern how the public sector entity will regulate constituent organizations, including the operations of the public sector entity itself. |
| The end-to-end perspective of crossing or sending something across a geographic border. |
| The end-to-end perspective of bringing a case, evidence, and testimony through the court system, obtaining a decision, and enacting the decision. |

| |
|---|
| The end-to-end perspective of planning and executing an initiative. |
| The end-to-end perspective of planning and executing a meeting. |
| The end-to-end perspective of planning, executing, and communicating a training course for the purpose of increasing knowledge and skill. |
| The end-to-end perspective of making an asset available for use within the organization and to the individual(s) requesting the asset. |
| The end-to-end perspective involved in creating and launching a new or modifying or decommissioning an existing government service. |
| The end-to-end perspective of planning, specifying, designing, and commissioning major or minor modifications to infrastructure, including roads, railways, bridges, tunnels, stations, rail corridors, and related structures. |
| The end-to-end perspective of developing an individual's career, from performance assessment to skills and experience enhancement and individual redeployment. |
| The end-to-end perspective of developing or refining a set of integrated and aligned visions, goals, objectives, and courses of action that provide direction and guides activity. |
| The end-to-end perspective of requesting, creating, and delivering of information products to requester. |

Copyright Business Architecture Guild 2025

| |
|---|
| The end-to-end perspective of ensuring conformance with legislation and organization-driven policies, from identifying compliance requirements, implementing controls, evaluating controls' effectiveness, addressing compliance incidents, and reporting compliance as required. |
| The end-to-end perspective of activities necessary for establishing a new or updating an existing agreement with a partner or a constituent. |
| The end-to-end perspective of designing, articulating, approving, updating, and publishing a standard. |
| The end-to-end perspective of executing a campaign, from identifying the need for a campaign, to planning, designing, implementing, and measuring the effectiveness of the campaign. |
| The end-to-end perspective involved in completing a financial transaction for an agreement. |
| The end-to-end perspective of planning, initiating, running, and terminating an operation. |
| The end-to-end value delivery perspective for creating a ready-to-acquire product. |
| The end-to-end perspective of applying for, qualifying for, and receiving a new or renewal of a certification. |
| The end-to-end perspective of a government organization receiving a request for, approving, and providing financial assistance. |
| The end-to-end perspective of submitting a request, being qualified for, and receiving the requested service. |
| The end-to-end perspective of establishing the right to own, use, and develop government-owned, community-owned, or privately-owned land. |
| The end-to-end perspective of identifying, exploring, and selecting an individual to fill a need within an organization. |

| |
|---|
| The end-to-end perspective of identifying and commencing business with other organizations for mutual benefit. |
| The end-to-end perspective of deciding where to make investments, based on the understanding of the enterprise's goals, strategy, current positions, and external forces. |
| The end-to-end perspective of establishing a stated amount or percent of liquid assets that the government estimates as needed on hand for unearned premium reserves and outstanding losses, such as claims and related outstanding liabilities. |
| The end-to-end perspective of drafting a bill, consideration and revision, and approval of the legislation, enactment into law, and possible nullification of outdated laws. |
| The end-to-end perspective of requesting a patent, trademark, or copyright, reviewing the request, and granting the request. |
| The end-to-end perspective of activities related to reaching settlement of the dispute among one or more third parties. |
| The end-to-end perspective of activities necessary to identify, scope, track, and address an incident as well as identify areas of improvement in order to reduce future likelihood or improve future responses. |
| The end-to-end perspective necessary to track and resolve a question, request, feedback, or comment. |
| The end-to-end perspective of identifying, scoping, mobilizing, and otherwise responding to an emergency incident. |
| The end-to-end perspective of determining to compensate for, or restoration of, an asset for a loss. |
| The end-to-end perspective of requesting, qualifying for, and receiving authorization for immigration or emigration. |

Copyright Business Architecture Guild 2025

| |
|---|
| The end-to-end set of activities necessary for determining, communicating, and settling, i.e., exchanging funds against a payment obligation. |
| The end-to-end perspective of executing a financial instrument trade, including clearing and settlement. |

| Information Concept | Information Concept Category | |
|---|---|---|
| Accreditation | Primary | An endorsement by a duly recognized and acknowledged third party that indicates ability, competence, knowledge, provenance, or quality. |
| Agreement | Primary | A set of legally binding rights and obligations between two or more legal entities. |
| Agreement Term | Secondary | A legally enforceable condition set forth within the bounds of an agreement. |
| Asset | Primary | Tangible or intangible property. |
| Biological Organism | Primary | Non-human living thing. |
| Brand | Primary | A name, symbol, or design that identifies and differentiates products, offerings, or organizational identities. |
| Campaign | Primary | An outreach activity that targets a specific population, for example, constituents, human resources, partners, and patients, to achieve a certain goal, such as marketing awareness, hiring activities, and health awareness. |
| Case | Primary | An instance of a need or demand that requires resolution, such as in the context of legal, social welfare, healthcare, or related government services. |
| Channel | Primary | A digital, analog, or physical conduit through which products, related services, or communications are delivered or received, including the Internet, phone, delivery service, satellite, radio, or physical means. |

| | | |
|---|---|---|
| Claim | Primary | A demand or request to indemnify constituents under the terms of an agreement. |
| Competency | Primary | The skills and knowledge necessary to do something. |
| Constituent | Primary | An individual or entity relative to an organization's sphere of responsibility. |
| Content | Primary | A creative work or other authored item, such as is manifested in audio/visual, still image, textual, experiential, mixed-media, or other forms. |
| Content Impression | Secondary | An instance of content consumption. |
| Conveyor | Primary | An apparatus or assembly, whether human or robot-piloted, that has the capacity to transport people and physical items, such as animals, goods, or other assets. |
| Decision | Primary | A conclusion or resolution reached after considering alternative options. |
| Dispute | Primary | An argument, disagreement, or protest of perceived injustice. |
| Energy | Primary | Sources of power. |

| | | |
|---|---|---|
| Event | Primary | An occurrence that has happened or may happen, especially one of importance, concern, or interest. |
| Evidence | Primary | Proof to support a proposition. |
| Finance | Primary | Monetary aspects and resources. |
| Currency | Secondary | An agreed medium of value exchange. |
| Financial Account | Secondary | A named container of monetary value transactions that are typically organized into assets, liabilities, income, expense, equity, and other related categories. |
| Financial Forecast | Secondary | A financial estimate, prediction, or projection. |
| Financial Position | Secondary | A consolidated and holistic representation of actual financial standing or activity for a point in time or duration. |
| Financial Transaction | Secondary | An instance of a monetary amount movement or related exchange across businesses, agreements, or financial accounts. |
| Monetary Amount | Secondary | A representation of value as expressed in a given currency. |
| Payment | Secondary | An obligation to remit or receive a monetary amount between an organization and a constituent, partner, or other external party. |

| | | |
|---|---|---|
| Tax | Secondary | A compulsory contribution of monetary value to governing bodies. |
| Financial Instrument | Primary | A tradeable asset, such as stocks, bonds, bills of exchange, futures, options, evidence of ownership, and cash. |
| Geographic Space | Primary | A physical area across land, air, and water. |
| Geographic Border | Secondary | A line of demarcation around a geographic space or between one geographic space and another geographic space. |
| Government Service | Primary | A named combination of goods, doing-of-work-for-others, and entitlements that can be offered to constituents. |
| Health Condition | Primary | A state of well-being of a human being or biological organism. |
| Human Resource | Primary | An individual who has, plans to have, or has had a legal agreement with the organization, which may include compensation and other benefits, on a temporary or permanent basis. |
| Incident | Primary | An unplanned, disruptive or potentially disruptive experience. |
| Infrastructure | Primary | A physical structure or facility, which may include power grids, communication lines, railways, roadways, bridges, tunnels, and pipelines or conduits for water, gas, and power. |

| | | |
|---|---|---|
| Initiative | Primary | A coordinated collection of temporary endeavors undertaken to create a unique outcome. |
| Inquiry | Primary | A question, request, feedback, or comment that may exist inside or outside of the organization. |
| Intellectual Property Rights | Primary | A legal protection, such as patent, trademark, or copyright. |
| Interaction | Primary | A set of contemporaneous collaborations or contacts about a given subject, over a span of time, between two or more entities, using one or more channels, at one or more physical or virtual locations such as meetings, interviews, seminars, or |
| Investment Portfolio | Primary | A set of resources expected to increase in value or provide income. |
| Job | Primary | A named category of accountabilities, whether remunerative or non-remunerative, associated with an assigned, specific, and accountable business duty, role, or function that can be executed by a human or non-human resource. |
| Language | Primary | A method of communication or dialect variant consisting of units of representation or meaning, such as numbers, words, symbols, sounds, or other physical manifestations and gestures, presented in a structured way. |
| Legislation | Primary | A set of authoritative directives that include laws or related statutory instruments. |
| License | Primary | An authorization to perform a regulated activity, awarded by duly recognized governmental agency or third party, applied to an individual or organization, to engage in an activity, such as fishing, or use of regulated objects, such as modes of transportation or hazardous materials. |
| License Term | Secondary | A legally enforceable condition set forth within the bounds of a license. |
| Location | Primary | A position or site. |

| | | |
|---|---|---|
| Market | Primary | Individuals, populations of individuals, or organizations constituting the demand for existing or future products and services. |
| Material | Primary | Food, ingredients, chemicals, waste, and other physical elements used to enable an outcome including sustaining life, the growing of crops, the construction of assets and infrastructure, and the powering of equipment and conveyors. |
| Message | Primary | A verbal, written, recorded, or digitally-represented communication, including missives, notifications, alerts, and other internally or externally targeted communication about the organization's mission, products, plans, activities, and other focal points. |
| Natural Resource | Primary | Matter that can occur in nature. |
| Network | Primary | A set of connected arcs and nodes that may be associated with infrastructure, assets, locations, routes, and other business objects. |
| Network Arc | Secondary | A connection or association between nodes in a network. |
| Network Node | Secondary | A connection point in a network. |
| Operation | Primary | An orchestration of work to achieve a specific objective constrained by time and location, which may include, for example, transportation center, monitoring station, law enforcement, or administrative shift cycles across government. |
| Order | Primary | An instruction, by one party to another, to buy, sell, exchange, provide, or deliver goods or services. |
| Order Item | Secondary | An order element that refers to a specific good or service. |

| | | |
|---|---|---|
| Partner | Primary | A legal entity that has, plans to have, or has had some degree of involvement with the organization. |
| Plan | Primary | An organized, sequenced set of steps or instructions, which may include milestones, intended to achieve a result when completed. |
| Policy | Primary | A set of rules, procedures, regulations, and principles, or, a codified proposed intent. |
| Public Sector Entity | Primary | A governmental body or collection of governmental bodies. |
| Research | Primary | A systematic investigation into materials and sources intended to establish facts and produce insights. |
| Route | Primary | A way or course taken in getting from a starting point to a destination, which may include stops along the way. |
| Schedule | Primary | An aggregation of schedule elements. |
| Schedule Element | Secondary | A line item that aligns time and one or more other objects, including work item, human resource, payment, event, or location. |

| | | |
|---|---|---|
| Standard | Primary | A convention, specification, or measurement, confirmed by a recognized governance body. |
| Strategy | Primary | An integrated and aligned association of visions, goals, objectives, and courses of action that provides direction and guides activity. |
| Course of Action | Secondary | A set of activities to be taken to achieve an objective. |
| Goal | Secondary | An end toward which effort is or should be directed. |
| Objective | Secondary | A quantitative, measurable result that contributes to the realization of a goal. |
| Vision | Secondary | An imagined future state of being. |
| Submission | Primary | A container that is used to exchange one or more requests, inquiries, messages, notifications, content, or other objects between parties. |
| Time | Primary | A point or duration in the past, present, or future. |
| Training Course | Primary | A structured theoretical or practical subject matter in a consumable format, associated with a curriculum, workshop, or seminar. |
| Trip | Primary | A journey between a starting point location and one or more targeted locations until a final destination is reached. |
| Vote | Primary | A formal indication of choice such as for a candidate election, referendum, or proposition. |

| | | |
|---|---|---|
| Work | Primary | Tasks and task queues. |
| Work Item | Secondary | A defined, well-bounded task that may be assigned to a stakeholder or corresponding asset. |
| Work Queue | Secondary | A container to hold, sequence, filter, structure, and present a set of work items. |

| Responsible for the coordination of policy on national security issues and provision of advice to the national executive. |

Copyright Business Architecture Guild 2025

| |
|---|
| Provides administrative services to all entities of the National Executive Office, including direct support to the incumbent holder of the Executive Office. Services can include financial management and information technology support, human resources management, library and research assistance, facilities management, procurement, printing and graphics support, security, and mail and messenger services. |
| Provides organizational leadership on strategic, operational, and administrative matters, which can include the domains of budget, financial management, risk management, initiative and resource management, human capital management, asset management, and executive secretariat. |
| Manages the orchestration of policy development, internal and/or external, delivery and policy-focused advice to the organization and its leadership in executing its remit. Policy development is often domain-focused, e.g., health policy, veterans services policy, defense policy, tax policy. |
| Responsible for policy and provision of advice to the national executive office on scientific, engineering, and technological matters relating to the national economy, national security, homeland security, health, foreign relations, the environment, and the technological use of resources. |
| Responsible for policy and advice to the national executive on issues relating to trade policy. Responsible for conducting bilateral and multilateral trade negotiations and the coordination of trade policy across the national government. |
| Highest tribunal in the nation for all cases under the laws of the country. |
| The intermediate appellate courts of the national judiciary, responsible for being the final arbiter in most appeal cases. |
| Responsible for acting as the main trial courts in the national judiciary for civil and criminal cases. |
| Responsible for acting as the main civil and criminal courts in territories falling under the control of the national judiciary. |
| Responsible for overseeing cases pertaining to international trade and customs. |
| Responsible for adjudicating disputes concerning national taxation, such as income tax disputes. |
| Responsible for the support of the judicial branch through the provision of administrative, legal, financial, management, program, and information technology services. |
| Responsible for leadership and policy to the nation on agriculture, food, natural resources, nutrition, and rural development. |
| Responsible for the synchronization and co-ordination of strategic direction and policy across the organization's administrations, offices, and officials. |

| |
|---|
| Provides oversight of civil and constitutional rights of constituents through legislation, policies, and actions. |
| Oversees and coordinates communications and administrative processes between the organization and the primary office of the legislative government. |
| Responsible for human resources, facilities, security and emergency planning, equal employment opportunity, library services, executive secretariat, and administrative support function. |
| Responsible for independent oversight, conducting audits and investigations, providing policy recommendations, and informing designated officials as to the status and deficiencies in the organization. |
| Advises the leadership and senior departmental officials regarding laws, regulations, executive orders, and judicial precedent pertaining to the organization and its operations. Responsible for legal and litigation services and support for legislative and regulatory activities. |
| Responsible for budget development and allocation, monitoring execution of funds to networks, and oversees financial management and accounting operations. |
| Responsible for the provision of objective, robust, and high-quality analysis to inform the policy development and decision-making processes. |
| Responsible for coordinating the preparation of organizational budget estimates, legislative reports, and regulation. |
| Manages the organization's internal and external communication channels and is responsible for delivering communication solutions that support the organization's strategic objectives. |
| Responsible for media briefings, handling press enquiries, and the development of communication material. |
| Provides representation and coordination with community leaders and groups. |
| Oversees the appeals process and other legal challenges, such as judicial and administrative reviews to and by the organization. Manages appeals for claims relating to constituents, staff, and government. |
| Enables the organization through the provision of efficient, effective, secure, and reliable technology services. |
| Responsible for developing food safety education, training, and technical assistance resources to support programs. |
| Oversees the marketing and promotion of the nation's agricultural products. |

| |
|---|
| Oversees programs developing and protecting the nation's natural and environmental resources in support of agriculture. |
| Responsible for administrating the organization's nutrition and food security programs and the promotion of dietary guidelines. |
| Responsible for overseeing risk mitigation initiatives, such as crop insurance services, conservation programs, and technical assistance, and commodity, lending, and disaster programs. |
| Provides analysis and policy to connect the nation's agricultural products and services to the global network and international trade. |
| Responsible for research, analysis, and education to develop safe, sustainable, and competitive food and agricultural system. |
| Responsible for overseeing initiatives to develop the economy and quality of life in rural areas through financial products, loans, grants, guarantees, and other services. |
| Promotes job creation, commerce, and economic growth by ensuring fair trade, the provision of supporting data, setting of standards, and conducting research and development. |
| Responsible for the synchronization and co-ordination of strategic direction and policy across the organization's administrations, offices, and officials. |
| Promotes sustainable economic development through investment policy targeted on innovation and competitiveness. |
| Responsible for promoting the growth and competitiveness of minority-owned businesses through access to capital, contracts, and market opportunities. |
| Responsible for the collection and organization of scientific, technical, engineering, and business information generated by government-backed research and development. |
| Advises the national government on telecommunication policy and regulation. |
| Acts as the primary point of contact between the organization and the business community. |
| Responsible for budget development and allocation, monitoring execution of funds to networks, and oversees financial management and accounting operations. |
| Enables the organization through the provision of efficient, effective, secure, and reliable technology services. |

| |
|---|
| Supports the organization's executive function, including secretary and ministerial, in fulfilling its remit and achieving its aims and objectives. |
| Advises the leadership and senior departmental officials regarding laws, regulations, executive orders, and judicial precedent pertaining to the organization and its operations. Responsible for legal and litigation services and support for legislative and regulatory activities. |
| Responsible for independent oversight, conducting audits and investigations, providing policy recommendations, and informing designated officials as to the status and deficiencies in the organization. |
| Oversees and coordinates communications and administrative processes between the organization and the primary office of the executive government. |
| Ensures that threats to the organization are identified, protected against, and the integrity of the organization is maintained. |
| Responsible for the development of strategic policy priorities and the provision of policy advice to the organization's leadership. |
| Manages the organization's internal and external communication channels and is responsible for delivering communication solutions that support the organization's strategic objectives. |
| Oversees and coordinates communications and administrative processes between the organization and the primary office of the legislative government. |
| Responsible for measuring and disseminating information about the nation’s dynamic economy, society, and institutions, fostering economic growth, advancing scientific understanding, and facilitating informed decisions. |
| Provides statistical and economic accounts data for the government to inform budget development, monetary policy, planning, and investment. |
| Provides analysis and reporting on national economic and demographic data. |
| Responsible for the provision of objective, robust and high-quality analysis to inform the policy development and decision-making processes. |
| Responsible for issues involving national security and technology through export regulation and controls. |
| Responsible for the development, implementation, and enforcement of export controls. |
| Responsible for administering laws relating to patents and trademarks. |
| Responsible for the administration of laws relating to patents and trademarks and the provision of advice on intellectual property matters. |

| |
|---|
| Provision of advice on exports and the enforcement of safeguards against unfair competition relating to imports and exports. |
| Promotion of the nation's trade through the provision of business matchmaking, market intelligence, trade advocacy, and commercial diplomacy. |
| Responsible for national marine resources, conservation, and management of fisheries. |
| Provision of analysis, reporting, and public service announcement on issues concerning oceans, waterways, and the atmosphere. |
| Provision of deployable technical expertise in the fields of engineering, earth sciences, oceanography, meteorology, and fisheries science. |
| Responsible for preserving and enhancing coastal resources and ecosystem through science-based solution. |
| Responsible for research and development of environmental products and services. |
| Responsible for the management and operation of research and surveying assets, e.g., fleets and aircraft. |
| Responsible for physical science initiatives to increase innovation and industrial competitiveness. |
| Responsible for establishing education policy, the collection of data on schools, dissemination of research, and ensuring equal access to education. |
| Responsible for the synchronization and co-ordination of strategic direction and policy across the organization's administrations, offices, and officials. |
| Provision of scientific evidence to inform educational policy and practice. |
| Responsible for independent oversight, conducting audits and investigations, providing policy recommendations, and informing designated officials as to the status and deficiencies in the organization. |
| Oversight of civil and constitutional rights of constituents through legislation, policies, and actions. |
| Provision of advice to the organization's leadership on matters relating to policy development, implementation, and review. |
| Advises the leadership and senior departmental officials regarding laws, regulations, executive orders, and judicial precedent pertaining to the organization and its operations. Responsible for legal and litigation services and support for legislative and regulatory activities. |
| Oversees and coordinates communications and administrative processes between the organization and the primary office of the legislative government. |

| |
|---|
| Manages the organization's internal and external communication channels and is responsible for delivering communication solutions that support the organization's strategic objectives. |
| Provides organizational leadership on strategic, operational, and administrative matters, which can include the domains of budget, financial management, risk management, initiative and resource management, human capital management, asset management, and executive secretariat. |
| Enables the organization through the provision of efficient, effective, secure, and reliable technology services. |
| Responsible for the promotion of academic excellence and improving educational opportunities for all constituents. |
| Provisioner of policy development and initiatives to assist constituents in acquiring language skills to facilitate integration and enhance opportunities. |
| Provision of policy development and initiatives to support children and adults with disabilities. |
| Responsible for promoting reform, innovation, and improvements in the provision of post-secondary education and further opportunities. |
| Responsible for the administration and coordination of initiatives related to adult education, literacy, career, and technical education. |
| Responsible for the administration of student aid initiatives in the form of grants, loans, and other financial assistance. |
| Liaison for faith and opportunity initiatives with the national executive office. |

| Description |
| --- |
| The end-to-end perspective of planning and executing the means, typically by ballot, to establish the constituents' choice for, or re-call of, a particular candidate(s), proposition, plebiscite, or referendum question. |
| The activities required to conceive, advance, posit, or originate a vote on a proposition, referendum, and/or election. |
| The activities required to identify propositions, referendum questions, register eligible candidates, election representatives and constituents as voters, schedule voting-related events, identify and deploy resources, book voting venues, address security concerns, and finalize the plan to conduct a vote. |
| The activities required to enable the voting to occur, including updating the electoral register, preparing fiscal analysis of propositions, registering candidates and election representatives, issuing voting invitation cards, ensuring the safety of voters and the data integrity of the votes, collecting proxy and postal votes, monitoring candidate campaigns, advertising polling stations locations, and |
| The activities required to manage voting and counting operations, including vote casting, securing, transporting, preparing votes for counting, checking and recounting as needed, and generally ensuring the integrity of the vote casting and |
| The activities required to certify the integrity of the voting process, formalize the outcome, and declare the results. |

| Value Stream | Value Stream Stage | Description |
|---|---|---|
| Establish Agreement | | The end-to-end perspective of activities necessary for establishing a new or updating an existing agreement with a partner or a constituent. |
| | Receive Request | The act of receiving a request or expressed interest in creating or updating an agreement and verifying the requester's identity. |
| | Identify Needs | The act of assessing the needs of the constituent in order to recommend the agreement. |
| | Collect Approval and Submission | The act of receiving the requester's approval to proceed as well as gathering and validating all remaining information needed to establish or modify an agreement. |
| | Evaluate Risk | The act of both parties, e.g., the requester and the business, assessing the risk of establishing or updating the agreement and agreeing to proceed. |
| | Activate Agreement | The act of activating the requester's agreement. |
| | Perform Post-activation Activities | The act of performing any post-activation activities, such as notifications, compliance verification, or quality assurance checks. |

| Value Stream | Value Stream Stage | Description |
|---|---|---|
| Obtain Government Service | | The end-to-end perspective of submitting a request, being qualified for, and receiving the requested service. |
| | Submit Request | Applicant or their proxy completes and submits application with supporting documentation as required for the type of government service requested. |
| | Accept Request | Determine whether all required information is present in the application, evaluate the match between the criteria for the specific type of government service and the applicant's qualifications as represented in the application data. |
| | Establish Agreement | Establish and approve the service agreement and its delivery plan, complete the recording of the decision for audit trail, inform other agencies and organizations as appropriate, process fees associated with transaction processing. |
| | Deliver Government Service | The act of providing the approved government service to the constituent using a delivery method most appropriate for the type of service and the requester's circumstances. |
| | Appraise Service | A review is conducted of the government service, covering the design of the service, its delivery, and the outcomes delivered for the constituent. |

Return to the Value Stream Inventory
